MEMORANDUM FOR Director, Directorate, Plans, Mobilization, Training, and Security, Fort Benning, Georgia 31905

SUBJECT: Oscar 13 (Soto Range), 25m Zero, M9 Pistol, 10m Machine Gun Zero, ARM 3(Day and Night)

1. **Purpose:**

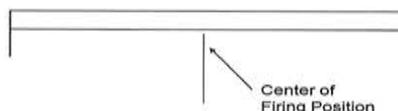

The purpose of this memorandum is to outline the training concept and scenario for Firing on Oscar 13 (Soto Range) using live ammunition. The training will familiarize Soldier's on firing techniques relative to combat conditions in the contemporary operating environment, firing realistic training scenarios from existing firing points and targets arrays with live munitions. During the execution of training at Oscar 13 (Soto Range), Soldiers will be able to train on the following tasks with this training packet.

- 25m Zero (Day and Night)
- 10m Machine Gun Zero (Day and Night)
- ARM 3 Day, ARM 3N Night
- M9 Pistol

2. **Zero:**

Fire from existing firing points at the 25 meter targets with M16/M4/M9. Four foot target frames will be used through-out this scenario (See Sketch). Firing orders will move to their firing points at the low ready keeping their weapon pointed down range. Soldiers will receive ammunition from the ammunition Supply Point, (ASP). Soldiers will place their weapon on the Platforms. Soldiers waiting to fire will place their weapon to the rear of the platform either on the right side or left side. Soldiers will not Lock and Load their weapons until told to do so by the Tower NCOIC. Weapons will be cleared and remain on the firing line prior to moving downrange. Weapons will be cleared in accord with weapons clearing Procedures. **At no time will units proceed past the 25 meter target line. See Figure #1 for authorized firing positions on the Platform.**

PLATFORM FIRING FROM CENTER ONLY  
ONLY ONE SHOOTER PER FIRING POSITION

### Figure #1 Positions of the Zero Firing on Oscar 13 (Soto Range)

3. **ARM 3 (Day), ARM 3N (Night)**: Soldiers will train and fire under controlled conditions at all times. Soldiers will familiarize with the Close Combat Optic (CCO), Infrared Laser Device (PAQ 2, 4, 15), and NVG's (ANPVS14), to engage targets during the day and night. During the day portion of the training, a tower official gives all firing commands. During the night portion, a firing point official gives firing commands with the tower official acting as overall safety. Soldiers will pick up ammunition from the ammo point and proceed directly to their firing point. All unused ammo will be returned to the ammo point. Soldiers will fire from fixed platform firing points in the prone supported firing positions. Four foot target frames will be used; the paper target will be placed in the center of the four foot section of the frame. The Soldiers are instructed when to load their weapons, and when to engage targets. At the conclusion of the exercise, weapons will be cleared IAW weapons clearing procedures. All downrange feedback will be given from the tower. (See Figure #1 and Firing Line Enclosure)

- a. **Laser's**: Class III A lasers are not eye safe on dual low mode within 25 meters. PEM – 1A is not a tactical laser and must be used within 25 meters. Laser Warning Signs will be in place prior to opening the range. **Range safety briefing will include hazards using Lasers and NVD's.**

4. **10 Meter Machine Gun Zero**: 10 meter Machine Gun Zero will be conducted in the following manner. Soldiers will pick up ammunition from the ammo point and proceed directly to their firing point. All unused ammo will be returned to the ammo point. . The Soldiers are instructed when to load their weapons, and when to engage targets. At the conclusion of the exercise, weapons will be cleared weapons clearing procedures. All downrange feedback will be given from the tower.

- Soldiers will use the 10 meter targets on Oscar 13 (Soto Range) for machine gun zero. Four foot target frames will be used, the paper target will be placed in the center of the four foot section of the frame.  
(See Figure #1 and Firing Line Enclosure) Lanes 1,3,5,7,9,11,13,15,18,20,22,24,26,28,30 and 32, are the designated lanes for this event. **OIC/RSO will make sure that the 25m Target frames are laid down before start of this event.**
- Preliminary Gunnery: In this phase the Soldier learns and demonstrates proficiency on individual skills that prepare him/her to fire live ammunition. This includes mastering mechanical training, the four fundamentals of marksmanship, T&E manipulation, sight adjustment, crew drill, and firing commands.
- Basic Gunnery: In this phase, the Soldier applies the fundamentals in live fire exercises during day and night conditions. This includes zeroing, 10 meter firing with crew drill, field zeroing, and transition firing with crew drills.
- Advanced Gunnery: In this phase, Soldiers are trained on combat techniques of employment, and live-fire exercise.
- Remedial training will be conducted in any of the phases of training where the Soldier does not meet the standard. The instructor will identify any Soldier having trouble with the task and must retrain the Soldier as possible. This will allow the Soldier to maintain the same level of proficiency as the other Soldiers.

5. **Safety:**

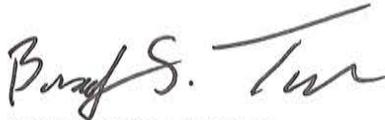

- a. Unit will maintain continuous contact with Range Control at all times. If communications are lost the unit will go into a self induced check fire until communications are restored.
- b. There will be no more than One Firer per Firing Point on this range.
- c. No one will proceed past the 25-meter target line at any time.
- d. Four foot target frames will be used through-out this scenario.

6. **Risk Management Worksheets:**

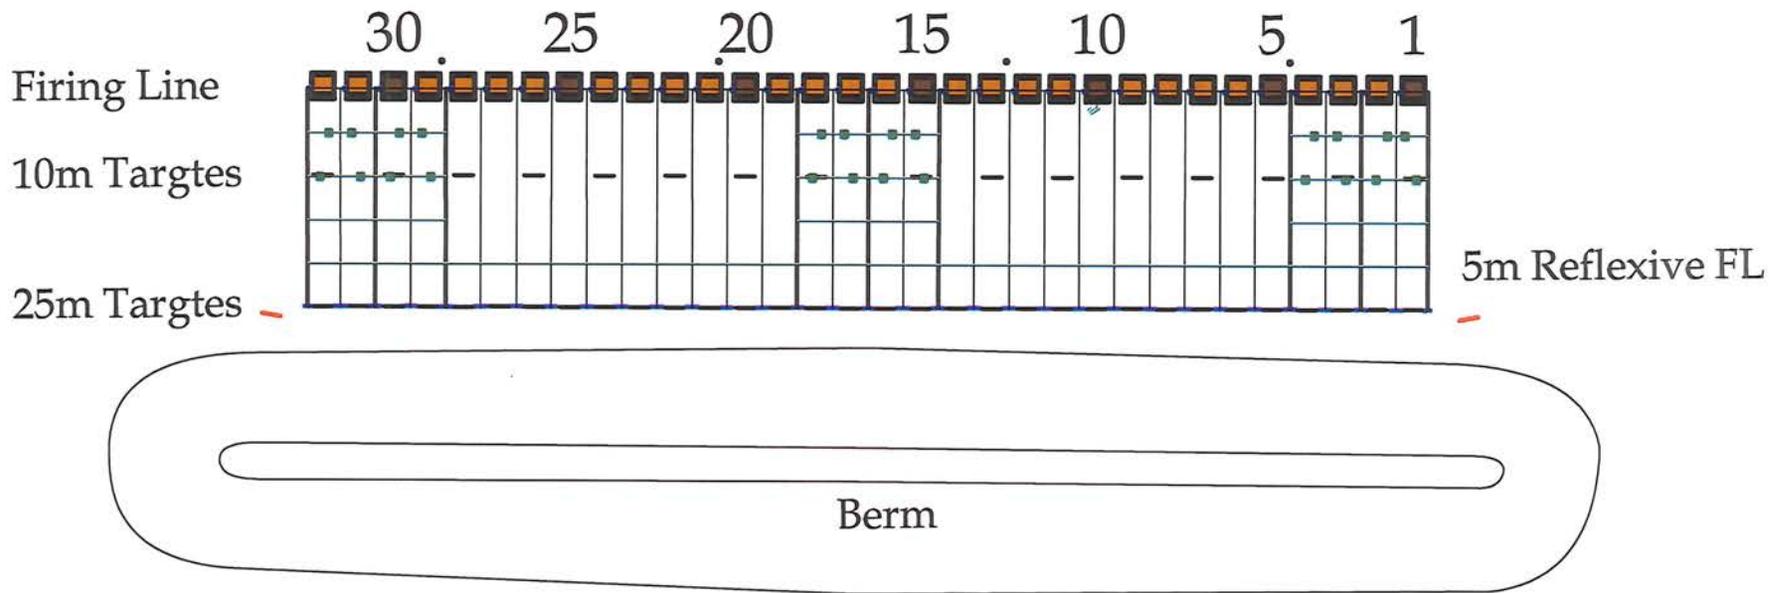

Units training on Oscar 13 (Soto Range) using this Range Division standard packet are required to have in their possession while occupying Oscar 13 (Soto Range) their current commander's approved risk management work sheet along with Post Safety's concur/non-concur memorandum. These documents will be provided to the Chief of Range Operations prior to units submitting a request to schedule Oscar 13 (Soto Range). Units are also required to provide updated risk management worksheets along with an updated Post Safety concur/non-concur memorandum when there's a change in the unit command to the Chief of Range Operations prior to units submitting a request to schedule Oscar 13 (Soto Range).

14. **General:**

- 1) **Units cannot do ALT-C, CQM, Reflexive/Stress Fire, Alt Firing Positions, or Any type of barricade on this range.**
  - 2) **There will be no deviations to this scenario unless approved by Range Operations.**
15. Point of contact for this memorandum is the undersigned @ 706-544-6385.

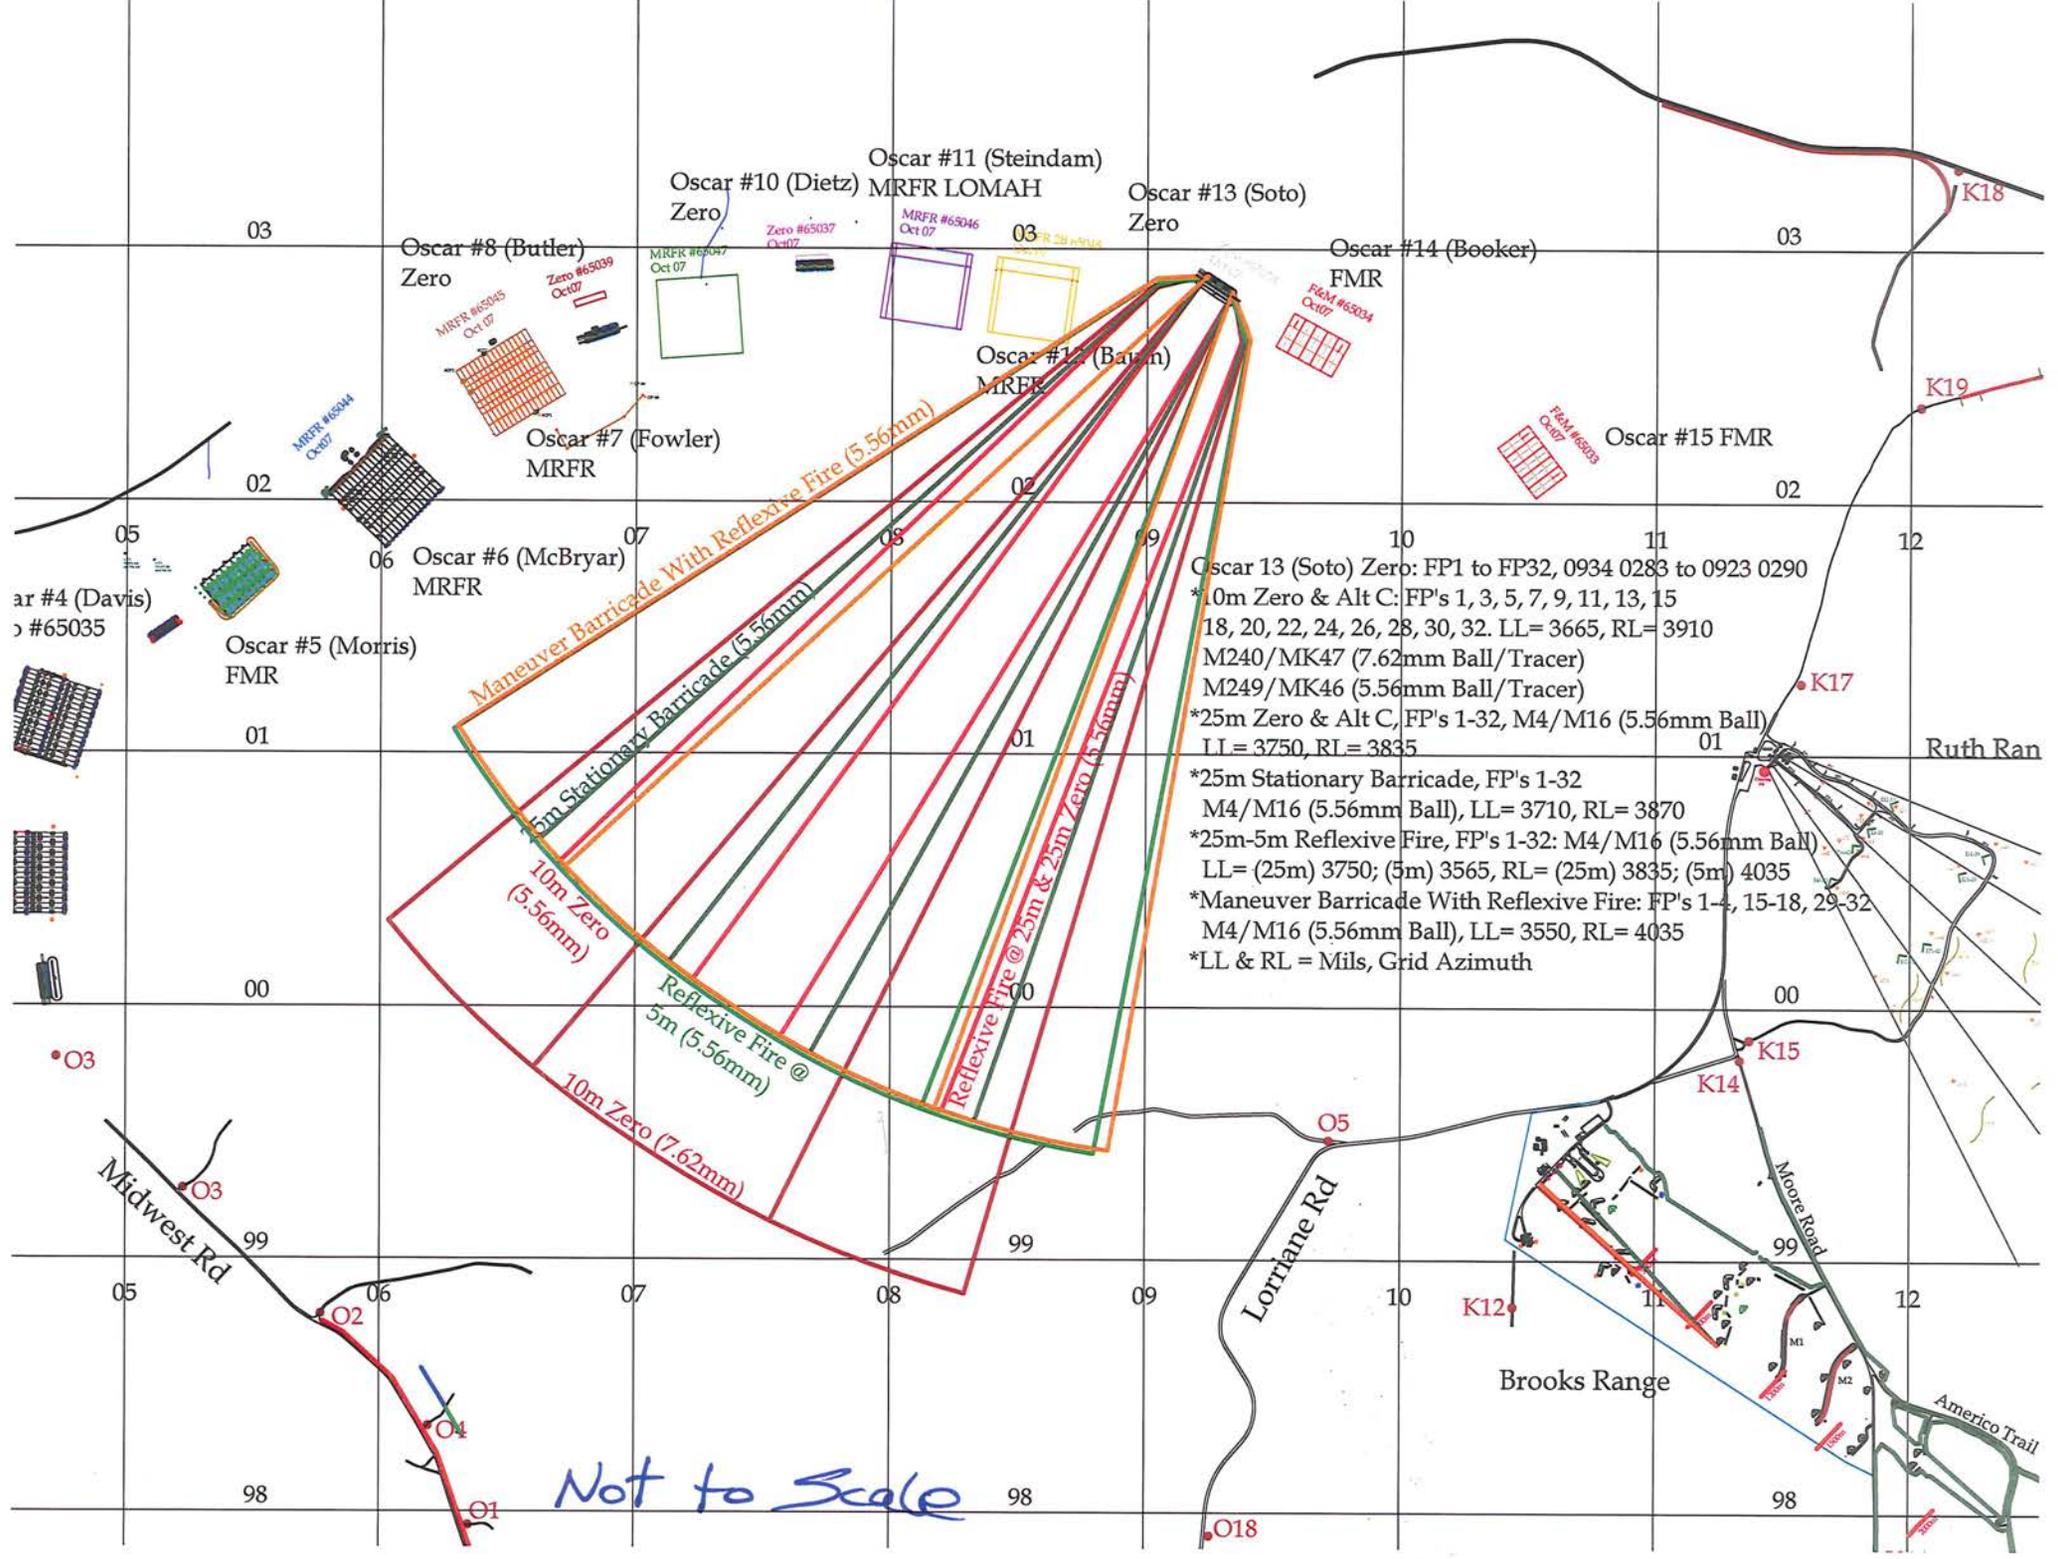

BRADLEY S. TESCH  
GS12, Chief, Range Operations
