DATE: March 13, 2014

COMMUNITY NOTICE: Fort Benning conducting controlled burning March 13.

FORT BENNING, Ga. – The Directorate of Public Works is conducting controlled/prescribed burns in the south and central portions of post training areas today. Winds are predicted from the northwest and will keep smoke away from most sensitive areas, community members may however notice some smoke near these areas today.

Prescribed burning helps prevent the occurrence of wildfires that can result from some military training activities. Firebreaks around impact areas are maintained annually to contain any wildfires that may be triggered by munitions.

It's our intent to keep you informed on why and when we conduct controlled burning on post, so you not only have a better understanding of its necessity, but you can plan for it and adjust your activities, as needed. For more information, community members may call 706-545-2237. For after hours, please leave a message. Media who would like more information on controlled/prescribed burning should call 706-545-6674 or 706-545-8970.

You may also visit the Smoke and Sound Web site at <https://www.benning.army.mil/garrison/smokeandsound/> for maps and other information on training. Individuals who want to be notified of firing on ranges and prescribed burning may be added to the notification list by emailing usarmy.benning.imcom.mbx.web@mail.mil.
