MEMORANDUM THRU Commander, 4<sup>th</sup> Ranger Training Battalion, Ranger Training Brigade, Fort Benning, Georgia 31905

FOR G3 (Training), XX Division (requesting unit)

SUBJECT: Procedures for Requesting a Mobile Training Team (MTT) In Support of a Reconnaissance and Surveillance Leaders Course Training Requirement.

1. Purpose. Provide units with current request procedures and outline specific resource requirements.
2. Requesting Procedures. Units desiring an RSLC MTT must submit a request to Commander, United States Army Infantry Center, (ATTN: G3, Chief of Operations and Training). This request should go THRU the requester's MACOM and TRADOC. Formal requests should be submitted 180 days prior to training execution. It is recommended that units conduct prior coordinations with the Ranger Training Brigade to determine timing and supportability.
2. MTT Types. In an effort to meet the needs of the force, RSLC offers a variety of MTT packages.
  - a. ASI Producing Course. Units may request the full RSLC ASI producing POI to be executed at either the requesting unit's home station or at Ft. Benning, GA. This MTT will consist of the entire 26-day program of instruction (POI) and graduates will be authorized the 6B additional skill identifier (ASI), identifying them as a Reconnaissance and Surveillance Leader. Minor modifications can be made to the POI based on the unique requirements of the requesting unit.
  - b. OC/EXEVAL Package. RSLC can provide Observer Controller teams of reconnaissance, communications, and command and control subject matter experts to assist units conducting EXEVALs or pre-deployment certification exercises. These OC teams will conduct field AARs with evaluated units, provide feedback on unit TTPs and recommended improvements, and provide an outbrief with the host unit's chain of command as desired.
  - c. Modular Training Packages. RSLC can tailor modular training packages to support the mission requirements of requesting units. These packages vary in length depending on the training objectives of the requesting unit. Typical modular packages include advanced beyond line-of-sight communications, collection and reporting, urban reconnaissance techniques, vehicle, equipment and weapon identification, insertion and extraction techniques, or combinations of the above. These modular training packages will not authorize attendees the 6B ASI.
3. MTT Hosting Unit responsibilities.
  - a. Home Station. Units that choose to host home-station MTTs are responsible for providing all infrastructure, training area, vehicular, aircraft, and medical support required to run the course as outlined in the enclosures to this document. Additionally they accrue all cadre TDY expenses (15-25 cadre). All required supporting cadre are on station the minimum amount of time prescribe to conduct the current RSLC program of instruction in order to reduce TDY costs. Hosting a home-station (your location) MTT is usually only cost / resource effective for OCONUS units.
  - b. Resident. Units may request to reserve all ATTRs slots for a Fort Benning resident MTT. Upon approval, a regularly scheduled RSLC class will be re-numbered to a "5" series class and all resources (rotary/fix wing aircraft, ammunition, and tactical vehicle transportation) will be provided by USAIC in support of the RSLC program of instruction. All student meals and billeting will also be provided by RSLC and the 4<sup>th</sup> Ranger Training Battalion. The requesting unit is only responsible for the costs associated with transporting their students and equipment (if desired) to Ft. Benning, expendable supplies, and for replacing any equipment broken due to the negligence of their students. The requesting unit is afforded the flexibility to modify the POI to support the unique

considerations of their unit (i.e. remove the airborne operations for a non-airborne unit or utilizing the host-unit's communications and collection and reporting equipment). Course modifications, dates, and student load will be finalized NLT 120 days prior to course execution. Student roster will be provided and finalized thru the 4<sup>th</sup> RTBn 30 day prior. This type of MTT is typically more cost effective for CONUS units.

c. OC/EXEVAL Package. The host unit is responsible for all TDY costs associated with the OC teams requested to support host unit EXEVALs or pre-deployment certification exercises to include travel, billeting, meals, on-site transportation, and incidentals.

d. Modular Training Packages. Host unit responsibilities will vary widely based on the type of training requested. Host units will be responsible for providing all training resources, infrastructure, etc required to conduct the training agreed upon. Additionally they will be responsible for all travel, billeting, meals, transportation, and incidental expenses of the RSLC cadre supporting the training.

4. Critical Requirements. The attached enclosures detail all resource requirements for a Home Station MTT. Once an MTT is approved (regardless of type), RSLC will host a VTC with the requesting unit to finalize resource requirements and timing of the Pre-deployment site survey (PDSS), if required. In order for a PDSS to be effective the host unit must designate the resources that will be utilized for MTT execution prior to the arrival of the PDSS. During the PDSS, an initial progress report (IPR) will be scheduled during the first two days with the following attendees/representatives: G3 Operations, G3 Schools, host unit S3 & S4, host unit Schools NCO, TMP, Range Control, G6, and host unit S6.

5. Enclosures.

Enclosure 1: POI Training Calendar

Enclosure 2: MTT Support Requirements

Enclosure 3: MTT Planning Timeline

5. POC this action is the undersigned at 706-544-6216 or RSLC Operations Officer/NCO at 706-544-6018.
