Facilitations:

Keys to facilitation

A. Create action in the classroom

1. Avoid lecturing
2. Engage students in learning through activities

B. The classroom layout sets the tone

1. What layout is best for the desired setting?
 - a. Group work: tables and semi-private or secluded workspaces
 - b. Take focus off of the instructor and placed on the group but still allowing interaction with the instructor

C. Create expectation in students that they will participate in learning

1. This is difficult if students have been conditioned to be passive learners
 - a. Be patient and provide guidance and positive reinforcement
 - i. As students succeed they will change their expectations
 - ii. Some will continue to want to be passive learners despite your best efforts – do not be discouraged, eventually they may participate or other students may influence them to participate

Tips for facilitating discussion:

1. Get all of the students involved
 - a. Use small groups discussing the same idea to include all students
 - b. Inattentive students should be redirected back to the group
 - c. Move the discussion around the class
2. You don't have to comment on each person's contribution
3. Paraphrase: check your understanding and the students
4. Redirect an inaccurate or incorrect statement to the class for correction

5. Elaborate – suggest a new way, even when the student seems to have answered the question correctly
6. Energize – quicken your responses, use appropriate humor
7. Disagree (gently) or play devil’s advocate
8. Mediate differences in opinion
 - a. Mediation is a balancing act; try to keep the discussion going without interjecting yourself as the authority
 - b. Encourage students to back up their statements with facts
 - c. Remind everyone to respect differing opinions
9. Pull together ideas
10. Allow students to summarize what occurred in the discussion group
11. Provide follow-up information for additional study or reading
