MEMORANDUM THRU: Chief, Range Operations, Directorate of Plans, Training & Mobilization

FOR: USAMU, International Rifle / Pistol and Service Rifle / Pistol Sections

SUBJECT: Pool Range Complex Live Fire Scenario, Range Utilization SOP

1. USAMU is a strategic enabler of U.S. Army Accessions Command. Its first mission essential task is to support Army recruiting and accessions in an effort to connect America's people to America's Army. To this end, the Unit frequently conducts demonstrations, clinics, and competitions that routinely involve civilian participation. This civilian or non-military participation includes juniors, JROTC cadets, college students, ROTC cadets, MCoE visitors attending official events, DoD employees, non-military organizations, and organized clubs. USAMU's second mission essential task is to support the Warfighter, therefore Soldiers, other Armed Forces Services, Foreign Services, and USAMU Personnel coordinate for use of Pool Range for training and Soldier Rifle/Pistol qualifications.
2. Pool Range Complex is a Known Distance small bore, rifle, pistol, and air range. This Range is a multipurpose indoor/outdoor facility, which can be arranged to fire several different types of Competitive Disciplines, Training, and Qualifications. All firing takes place from fixed firing points on the range. There is no maneuver type firing done on this facility. Civilian and military personnel stay in place at their respective firing point until they have completed their course of fire.
3. Rifle Qualifications are fired on Pool Range Complex during the year. The alternate rifle course of fire out of FM 3-22.9 is the course that is used on this range. During Marksmanship Training on Pool Range Complex, all of firing is done in the semi-automatic mode. The techniques used in marksmanship training are primarily derived from FM 3-23.35, FM 3-06.11, and FM 3-22.9. Civilian and military personnel fire under controlled conditions at all times at target points 1 to 80 for .22 cal through .45 cal pistols and .22 cal rifle competitions and 30 to 80 for the rifle competitions. During training, and in competition, a line official or range safety officer gives all firing commands from the center of the firing line. Civilian and military personnel are told when to load and when to observe their target. Their time begins when a designated start signal is given. Civilian and military personnel fire their appropriate course of fire, then a designated signal is sounded to mark when their time has expired. Line safeties and judges clear the firing line and make note of any saved rounds. During training the NCOIC or his representative is responsible to designate the line safety that will clear weapons after each

ATAL-SBM-C

SUBJECT: Pool Range Complex Live Fire Scenario, Range Utilization SOP

phase of firing is complete. During the firing phase it is the range safeties responsibility to ensure the range is safe until completion of that phase of fire and all weapons are cleared. NCOIC is responsible to designate a line safety that will clear weapons after each phase of firing is complete. The line is completely cleared prior to civilian or military personnel moving downrange to change targets or to score targets in qualification.

4. The competitive disciplines shot on the indoor area of Pool Range Complex are the 10-Meter Air Rifle and Air Pistol, .22cal through .45 cal pistols and .22 cal rifles. Both sides of the indoor facility can be arranged to host over 60 Soldier/ Competitors during a 10-Meter air event. Civilian and military personnel fire from a stationary position behind the 10-Meter firing line wall and engage their respective target on the 10-Meter target line. There are line safeties and Judges that monitor the firing line throughout the events, training, qualifications, and competitions. Civilian and military personnel are told when to load their weapon and when their time begins to start firing. During firing, there is a competition clock and a Judge, which gives the Soldier/Competitors the amount of time remaining to fire on their targets. The entire range is given a cease fire when their time has expired. NCOIC is responsible to designate a line safety that will clear weapons after each phase of firing is complete.

5. USAMU Personnel will ensure that all facilities accommodate Military Disabled, Non-DoD Disabled Civilians or Paralympic Competitors. Military Disabled, Non-DoD Disabled Civilians or Paralympic Competitors that cannot load their own firearms will be required to have their caregiver load their firearm under the supervision of USAMU personnel or certified range safety personnel while maintaining a safe operation and orientation of the firearm. Military Disabled, Non-DoD Disabled Civilians or Paralympic Competitors will only fire from an approved firing device and be under the direct supervision of the caregiver, USAMU personnel or certified range safety personnel while maintaining a safe operation and orientation of the firearm. When Military Disabled, Non-DoD Disabled Civilians or Paralympic Competitors fire from wheelchair or rolling devices, caregivers, USAMU personnel or certified range safety personnel will ensure that the equipments is properly secured to prevent movement while handling firearms. Military Disabled, Non-DoD Disabled Civilians or Paralympic Competitors will only put firearms on fire, clear firearms, perform misfire procedures under the direct supervision of the caregiver, USAMU personnel or certified range safety personnel while maintaining a safe operation and orientation of the firearm.

6. Safety: During Qualification all Soldiers will be on line at the same time engaging stationary targets. Soldiers will follow all commands of that safety while conducting training and drills. Weapons will be on safe when not engaging targets. A Combat Lifesaver and aid bag is always on the range. In case of emergency where a cease-fire is called hand and arm as well as verbal Cease-Fire will be given. Targets will be checked to ensure that they lie within the range safety fan. A safety briefing will be conducted by the RSO prior to training. All Soldiers receive Range Safety Briefings on procedures, equipment, and hazards.

ATAL-SBM-C

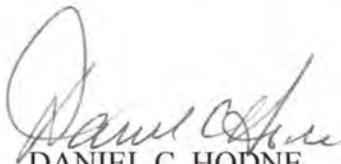

SUBJECT: Pool Range Complex Live Fire Scenario, Range Utilization SOP

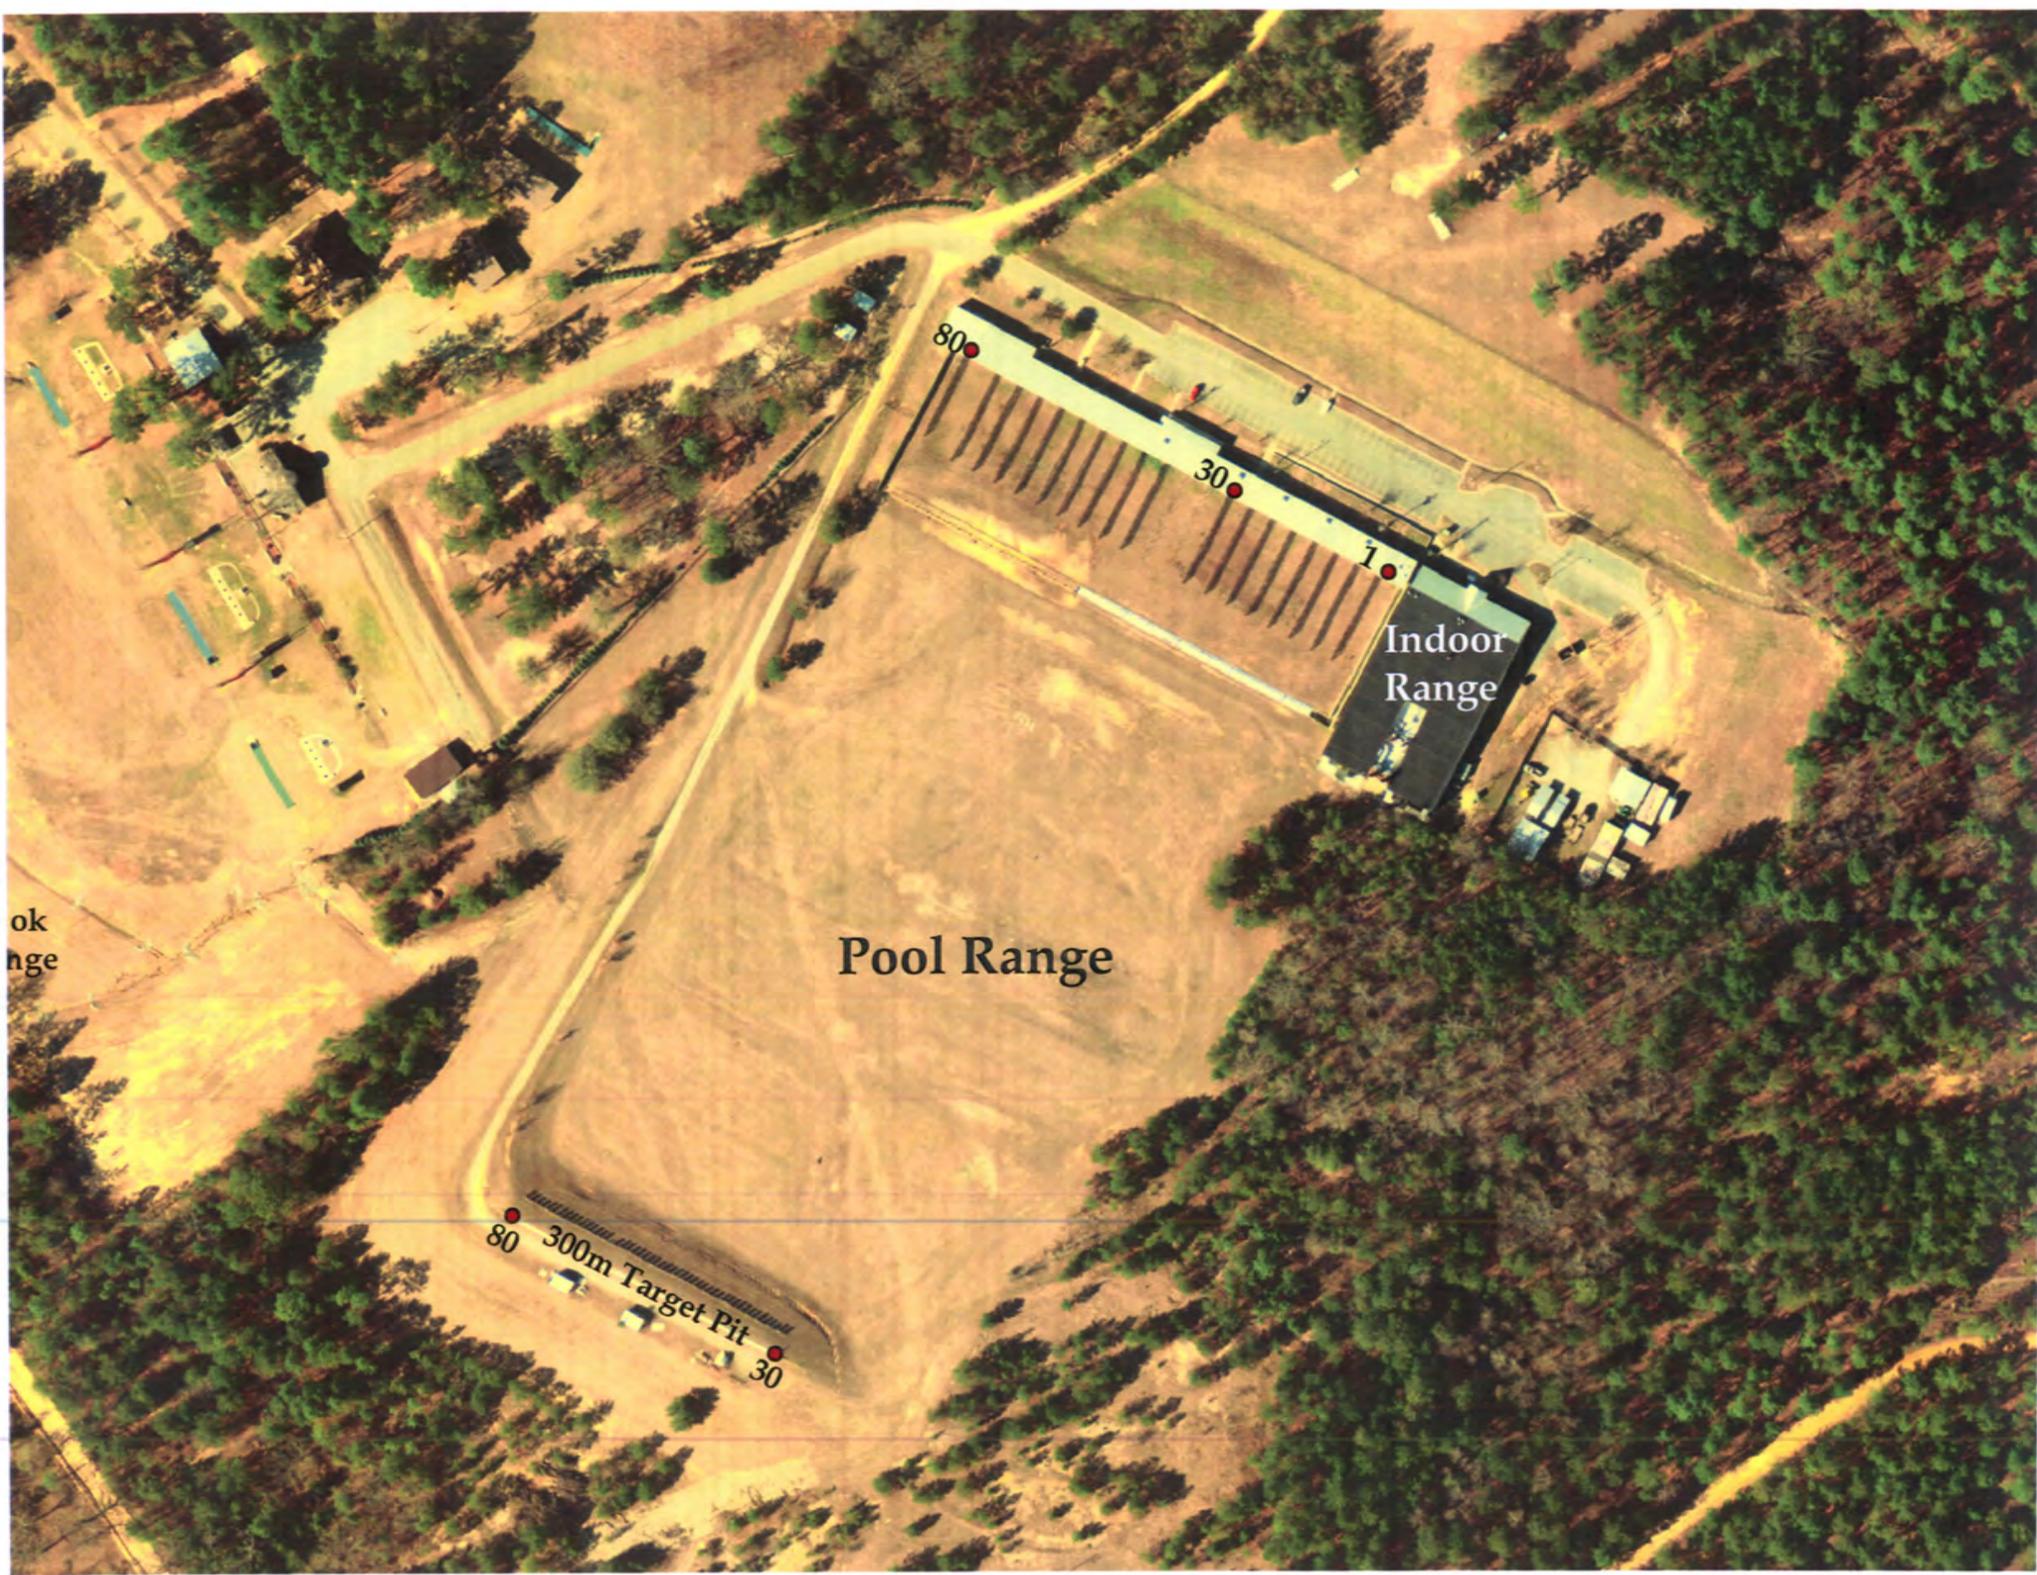

7. When an incident occurs on the range, regardless of injury or not, the OIC/RSO will immediately report it to Range Control and the using unit's higher headquarters. The following information will be furnished by the OIC/RSO to Range Control:

- a. Designation of unit.
- b. Range and location
- c. Type of weapon involved.
- d. Type of ammunition involved.
- e. Brief summary of what happened.
- f. Personnel injuries and extent.
- g. Full Name, SS#, Rank and unit of injured personnel.
- h. Extent of property damage.
- i. Intentions regarding an AR 15-6 investigation.

8. Unit will use the standard 9 Line MEDEVAC in case of illness or injury. Call 911 and determine what type of evacuation is the most appropriate for the injury. MEDEVAC will be IAW MCoE Regulation 350-19 and USAIC 40-2. Landing zone for MEDEVAC aircraft will be established prior to use and will be marked appropriately. Using units higher Headquarters and Range Control will be notified in this event

9. POC is CPT Howard G. Rice, USAMU S-3 OIC, (706) 545-7174/1410 or [howard.rice@usaac.army.mil](mailto:howard.rice@usaac.army.mil).

# RECORD OF ENVIRONMENTAL CONSIDERATION (REC)

**EMD Number:** 1120001

**Project#:** Unknown

**Project Title:** USAMU RANGES AND TRAINING AREAS

**Description of proposed action:**

ALL USAMU RANGES HAVE BEEN GRANTED CONCURRENCES IN PRIOR REQUESTS. PERSONNEL WILL TRAIN AND COMPETE BY FIRING LIVE FIRE AMMUNITION AT RANGES OF 7 TO 1000 YARDS INTO KNOWN AND UNKNOWN DISTANCES INTO THE IMPACT AREA.

**Project Location:**

EASLEY, HIBBS, PHILLIPS, PARKS, HOOK, POOL, BRINSON, MAERTENS, ENGLISH, ROOSEVELT, BURROUGHS, BUCHANAN, A1-A5

**Amount, Description, Location of Disturbance/Digging:**

N/A

**Number/Types of Vehicles:**

100

**Number of Personnel:**

200

**Type of Ammunition:**

.22-.50 CAL. Live

**Number/Types of Trees:**

N/A

**Size of Project Area:**

**Duration of Action:** Start: 10/1/2011

Stop: 9/30/2012

**Proponent:** nicole allaire

706-545-7174

**Organization/Unit:** USAMU

\*\*\*\*\*  
**DECISION:** Concur with conditions

**This Action is adequately covered in the Existing EA titled: 'Ongoing Mission and siting Activities, USAIC, FT.Benning, GA.'**

**(NA): Training involving LIVE FIRE and tracked vehicles has NO CATEX -- "Ongoing Mission and Siting Activities, USAIC, Ft. Benning, GA."**

\*\*\*\*\*  
**REC APPROVED THROUGH 30 SEPTEMBER, 2012**

**Natural Resources - RCW**

**Conditions:**

Michael Barron (709-544-7080), 7/20/2011

**See attached conditions. Note locations of red-cockaded woodpeckers on attached maps. Training restrictions apply. Unit commanders must make sure that all troops know the locations of restricted areas and understand these training restrictions. This is imperative since night training may occur. Boundaries are often hard to see at night, but this is no excuse for violations to occur. Two hour time restriction is for 2 hours once every 24 hour period. Note where digging may not occur. All trenches, fighting positions, etc must be filled in prior to leaving an area. There must be no cutting down or intentional destruction of any pine trees throughout the requested area(s). Units may fire on existing ranges but must make every effort to contain their firing to the established range footprints. Targets may not be moved from their current positions nor may new targets be established without approval via a separate 144R and a site visit with this office.**

**Noise**

**Conditions:**

Ellis Leeder ( 706 545 7576), 7/20/2011

This is normal training or flight training operations that must be conducted annually. If there are any complaints received, the Environmental Management Division IONMP and or POA programs will investigate by determining if the noise was detected by noise detection monitors, and then recommending operational noise mitigation actions to the appropriate personnel for the training actions. Please follow the MCoE Regulation 350-19 Army Sustainable Range Program Training Range and Terrain Regulations and Garrison guidelines addressing operational noise management and hours of firing operations per and (SEE CHAPTER 5 -1 SECTION C (Requests to fire .50 caliber or larger munitions, including demolitions) . In accordance with the Army's policy on environmental noise management, all efforts shall be made to minimize noise annoyances to the highest extent practicable with training operations without interfering with the proposed missions. Please follow the fly friendly program avoiding no fly zones. If any assistance or a copy of MCoE Regulation 350-19 is needed please feel free to contact Ellis Leeder at 706.545.2400 or email ellis.leeder@us.army.mil

**Hazardous Materials/Waste**

**Conditions:**

Dudley Carson (706 545 7570), 7/25/2011

Considerations for Field Training Exercises and Range Operations

1. Appropriate precautions must be taken to prevent hazardous material spills. Have adequate quantities of spill response supplies on hand. If a spill occurs use notification procedures as outlined in the Fort Benning Hazardous Waste Management Plan. Contain and clean up spill according to guidance provided by the Environmental Protection Management Branch. Any waste generated must undergo a waste stream analysis to determine appropriate management requirements. If any hazardous waste is generated it must be managed in accordance with Federal, State, Army and Fort Benning regulations.
2. Ensure personnel know the correct procedure for handling misfires at the range:
  - Closed containers (ammunition can marked "MISFIRES") will be used for the collection of misfires at each firing range.
  - The MISFIRE container will stay closed except to add or remove misfires.
  - Misfires SHALL NOT BE COLLECTED in any open container or cardboard box.
 All excess, unused munitions (including smoke canisters) must be returned to the Ammunition Supply Point (ASP) after the range operation is complete. Defective, misfired, or otherwise unserviceable munitions may be destroyed on the range, as part of the training exercise, in coordination with EOD.
 

A dud shall not be removed from the range; it will be marked, called into range control and will be properly disposed of by EOD personnel IAW/MCOE Reg 350-19, dated 23 July 2010.
3. Rubbish, empty containers and other waste shall be removed from the training area after the exercise. Contact EPMB for detailed information on the proper disposal of waste products resulting from the exercise.
4. Contact POC for questions or additional guidance.

**CWA - Training**

**Conditions:**

Jesse Taylor (706 545 0276), 7/21/2011

Environmental Review: Caution within training areas and motor pools should be taken to protect all nearby waterways (including perennial, intermittent streams and wetlands); as well as ground surfaces and any other sensitive areas in the vicinity of the training areas. Potential spills/releases from this activity that may occur before and/or during the FTX include: 1. Discharge and/or improperly disposal of oil or hazardous substances into or upon land, water, or into ground water areas from storage, handling and/or transportation of hazardous materials/waste; 2. Vehicle/equipment/generators leaks; 3. Fuel loading/unloading/refueling operations; 4. Field mess facilities/equipment/operations, and/or 5. Ammunitions /explosives (as applicable, before and/or during the FTX).

General SPCC Requirements: Ensure all hazardous materials are properly storage to prevent spill/discharges, to meet safety requirements for storage, and that containers are not exposed to the weather. Have adequate spill response supplies available during exercise for any spills that may likely occur. Use drip pans under vehicles and provide secondary containment for any fueling activities and hazardous material/waste storage. Locate all refueling operations and storage of hazardous materials/waste away from waterways and sensitive areas. See attached section on prevention procedures and CHECKlist (Figure 6.9.1) to be used during training exercise to comply with SPCC plan requirements. Ensure all wastewater from field mess equipment/operations particularly those involving oil/grease are collected and dispose properly. Do not discharge any wastewater into storm drains or dispose of oil/grease waste directly into land.

General ISCP Requirements: In the event of a spill/discharge – notify Range Control by radio or call 544-6291, and they will notify E-911 for Fire Department/HAZMAT Team assistance and/or notification of the EMD office (Spill Beeper 706-317-6584). As appropriate, and if personnel are trained – REACT to minimize spill damages. Submit a spill report to the EPMB Spill Program Manager (use Spill Response Report attached). All spills reaching navigable water must be reported immediately. The unit is responsible for the final cleanup of any spill during this exercise. Coordination with this office is required for clearance of the site.

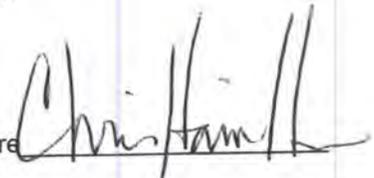

SPECIAL NOTE: See 2010 ASP SOP Training and Deployment.doc for further training requirements.
