MEMORANDUM FOR RECORD

SUBJECT: Malone One Range Scenario

1. Main Body

- A. Range is opened thru range operations via radio communication.
- B. Using unit detail arrives prior to main body.
- C. Detail conducts range setup in preparation for the arrival of the main body.
- D. Main body arrives and organizes in staging area; trainees are inventoried and bee sting, hot/cold weather injuries are identified.
- E. Soldiers/Trainees are moved to the Mock Bay bleachers.
- F. Soldiers/Trainees are given a Range Orientation/Safety Brief in compliance with the DRAW DD Form 2977.
- G. Soldiers/Trainees are given a demonstration on the different types of grenades, including Smoke and Incendiary. The grenades are initiated by Range Cadre only. Once the Cadre has initiated the smoke grenades, the Soldiers/Trainees are instructed to stand up and face the rear of the bleachers. The Soldiers/Trainees are instructed to not turn around to look at the Incendiary grenade. There is a pre-positioned Cadre member approximately 75 meters behind the Trainees. That Cadre member yells "Burning" and then initiates the Incendiary grenade. Once it has completely burned out, the Soldiers/Trainees file by platoon to view the capability of the grenade on their way to receive Pre Live Ordinance Training at the Mock Bay area. (See sketches Phase one and two).

2. Pre Live Ordinance Training

- A. All Soldiers/Trainees receive hands on training on the proper left/right hand grip, safe handling techniques, and how to properly store the hand grenades.
- B. All Soldiers/Trainees are taught "Distance and Accuracy" prior to Mock Bay training.
- C. All Soldiers/Trainees are taught "Mock Bay" prior to throwing live Grenades.
- D. Soldiers/Trainees must pass both Distance and Accuracy and Mock Bay training before moving on to Live Ordinance Training. (See sketch Phase three). No exceptions.

3. Live Ordinance Training

- A. Soldiers/Trainees will be given a period of instruction at the "Live Bay" on what is expected of them by the Ground Safety.
- B. Sequence of events.
 - 1) Soldier/Trainee exits the Viewing/Ready Room and is issued two live hand grenades. (Grenades are held visible as Soldiers/Trainees proceed to their throwing pit).

- 2) The Pit NCO Safety assumes control of the Soldier/Trainee.
 - 3) Utilizing the "Fist Over" hold. Once the Soldier/Trainee enters the pit they hand the non throwing grenade to the "Pit NCO". The "Pit NCO" secures the non throwing grenade on his hand grenade Pouch. If the first grenade is a dud, the "Pit NCO" will follow dud procedures.
 - C. The tower will direct all activities on the firing line. After Soldiers/Trainees exit the live bay they go back to viewing/ready room. The RSO and drill sergeants get accountability of each Soldier/Trainee after every firing order. After half of the unit has thrown, the Tower will cease fire and allow them to return to the upper or lower course to conduct Post Live Ordinance Training. After the unit has made their way to the upper/lower course, Live Bay will continue training. (See sketch Phase 4).
4. **Post Live Ordinance Training**
- A. When directed, the Soldiers/Trainees will return to the upper training course for the bunker class.
 - B. Soldiers/Trainees will then negotiate the Qualification Course (Upper Course), which is run by their Drill Sergeants (M16s will be utilized during this Buddy Team event) No ammo will be issued for the M16's during this portion of training.
 - C. All troops, weapons, equipment, ammunition and dunnage will be accounted for.
 - D. Soldiers/Trainees receive a brass and ammo check by their chain of command. (See sketch Phase 5).
 - E. Leveling of the range filling in holes with sand and all other range maintenance is conducted by Range Operations.
5. **Ammunition**
- A. Live ammunition is stored and guarded at the Live Bay area and is segregated by lot number.
 - B. Practice ammo with fuses are stored in the Practice Ammo Point. (Ref. sketch, bldg #2)
 - C. Only Cadre will control the ammo point.
6. **Safety**
- A. All training will follow the sequence above. All movement will be controlled based on unit size and training pace. Access to training areas will be dictated by ability to command and control as well as Safety concerns. Soldiers/Trainees will meet all prerequisites prior to Live Bay Training.
 - B. Field Litter Ambulance (FLA) with medics will be on-site at all times.
 - C. For all injuries resulting in threats to life, limb, or eyesight, on-sight FLAs are the first responders. Range Operations and E 911 will be notified accordingly.
 - D. Range Operations, Home and Using units will be notified of any safety violation, incident, or injuries.
 - E. Check OSUT/BCTB unit for:
 - 1: Range Request
 - 2: Ice sheets

- 3: Wet bulb
 - 4: Hearing and eye protection
 - 5: Unit Commander's Risk Assessment.
- F. Ensure that using unit enforces the No Upper Body PT rule the day off hand grenade training.
- G. All personnel, to include using unit cadre and soldiers/trainees, will receive a safety briefing prior to any training taking place.
- H. All personnel will wear Kevlar/ACH helmet, Body Armor vest, hearing protection and eye protection.
- I. All Soldiers/Trainees will receive instruction on proper Grenade/Fusing techniques as well as proper usage while at Malone 1. Soldiers/Trainees will be closely monitored while fusing the training grenades. (Leather working gloves will be use during fusing process and expended shell recovery).
- J. All Soldiers/Trainees must complete Distance & Accuracy and Mock Bay training in order to throw live.
- K. All Mock Bay failures will not be allowed to throw live. All failures will be determined by the Range NCOIC and the Range Safety Officer.
- L. All Pit NCOs are certified by the company commander and are competent in the "DROP PROCEDURES" and FAILURE TO THROW PROCEDURES. (See SOP for details).
- M. All Commanders and personnel that are part of the Soldiers/Trainees chain of command that want to go into the pits to observe Trainees throwing live hand grenades will be in the same uniform as the Soldiers/Trainees and will use the far left or right sub pits of any bay, and prior to going to the pits must acknowledge that they understand the "Drop Procedures". Example: Bay #1, pit #1 will have the observer on the left side (sub pit) and pit #2 will have the observer on the right side (sub pit) of the Soldier/Trainee throwing the live grenade. This also applies to bay #2 and bay #3. All observers will proceed with the safety and Soldier/Trainee to the appropriate bay/pits and will not depart until all live grenade training is complete for all bays.
- N. Any Bay (consisting of two pits) adjacent to a DUD grenade that is not separated by an earth berm will not be utilized until the DUD grenade has been cleared by EOD. If the dud grenade is in bay #2 (either pit), then all live grenade training will cease. The rule applies to bay #2 only. Live grenade training is allowed in bays #2 and #3 if a dud grenade is in bay #1 and allowed in bays #1 and #2 if a dud grenade is in bay #3.
- O. All Risk Management Worksheet controls will be observed. Violations of any will be brought to the attention of the NCOIC, RSO, Range Cadre and DS cadre.
- P. All fire extinguishers will be operational and in place.
- Q. Prior to the Live Fire portion a Guard will be posted at grid (GA01142 89390), to control personnel from entering the Live Fire area of the grenade range.
- R. Dud Procedures:
1. Activities in that bay will cease.
 2. All throwers and cadre in that bay will wait in their throwing pit for 5 minutes before exiting to shelter in a covered position.
 3. Range Operations and EOD will be notified immediately.

ATZK-SBA-A

SUBJECT: Malone One Range Scenario

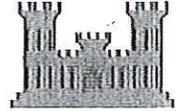

4. Adjacent Bays may continue training as long as there is a berm separation from the dud unless the DUD grenade is BAY #2. See paragraph 3-N above.
 5. Once EOD arrives all bays will cease activities until the dud has been neutralized.
- S. Live grenades will not be thrown into standing water, deep snow, or dense vegetation.
7. The point of contact for this memorandum is SFC Valdez, Daniel, the Master Trainer for Malone 1, at 706-626-6509.

RECORD OF ENVIRONMENTAL CONSIDERATION
(REC)

Date Submitted: 9/16/2014

EMD Number: 1426005

Project#: Unknown

Project Title: EMPLOY LIVE HAND GRENADES

Description of proposed action:

DURING THIS BLOCK OF INSTRUCTION SOLDIERS WILL BE REQUIRED TO EMPLOY LIVE HAND GRENADES, IDENTIFICATION, CONDUCT QUALIFICATION COURSE.

Project Location:

MALONE 01

Amount, Description, Location of Disturbance/Digging:

None

Number of Personnel:

220

Type of Ammunition:

LIVE, FUSE PRACTICE GRENADE,
SMOKE & 5.56 MM Live and Blank

Number/Types of Trees:

None

Size of Project Area: N/A

Duration of Action: Start: 10/1/2014

Stop: 9/30/2015

Proponent: paul.joseph

706-626-6509

Organization/Unit: 316th CRgt

Number/Types of Vehicles:

None

DECISION: Concur with conditions

This Action is adequately covered in the Existing EA titled: 'Ongoing Mission and Siting Activities, USAIC, FT. Benning, GA.'

(NA): Training involving LIVE FIRE and tracked vehicles has NO CATEX -- "Ongoing Mission and Siting Activities, USAIC, Ft. Benning, GA."

REC APPROVED THROUGH 30 SEPTEMBER, 2015

Cultural Resources - Archeological None

Edward Howard (706 545 1898), 9/25/2014

Natural Resources - RCW None

Michael Barron (706 544 7080), 9/19/2014

Hazardous Materials/Waste Conditions:

Carlos Ariasochoa (706 545 1857), 9/18/2014

Considerations for Training Exercises:

Defective, misfired, or otherwise unserviceable munitions must be managed IAW/MCOE Reg.350-19-5-10, Para 9-2 (Proper management of Misfired munitions). All excess, munitions must be returned to the Ammunition Supply Point after the field exercise is completed. Rubbish, empty containers and other waste (including used smoke/C2 canisters) should be removed from the training area. A dud shall not be removed from the range; it will be marked, called into range control and will be properly disposed of by EOD personnel IAW/MCOE Reg. 350-19, 23 Jul 2010.

Any wastes generated must be evaluated for their hazardous characteristics and disposed of in accordance with all Federal, State and Fort Benning Hazardous Waste Regulations. Appropriate precautions must be taken to prevent hazardous material spills. Adequate quantities of spill response supplies must be on hand while work is being performed. If a spill occurs use notification procedures as outlined in the Fort Benning Hazardous Waste Management Plan Chapter 14. Contain and clean up any spill according to guidance provided by the Environmental Programs Management Branch. EPMB provides an 8 hours course covering Hazardous Materials/Waste Management, Hazardous Waste Minimization, Safety, and Pollution Prevention.

Project Title: EMPLOY LIVE HAND GRENADES

Noise

Conditions:

Eillis Leeder (706 545 2400), 9/17/2014

This is training operations request for training. If there is any operational noise complaints received, the Environmental Management Division Installation Operational Noise Monitoring Program (IONMP) and or Public Affairs Office (PAO) programs will investigate and then recommending operational noise mitigation actions to the appropriate personnel for the training actions. This 144r must be present at the training site when occupying compartment or ranges.

GWA - Training

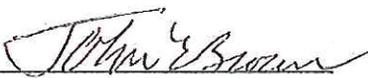

Conditions:

Leah Ropski (706 626 0492), 9/17/2014

Environmental Review: Caution within training areas and motor pools should be taken to protect all nearby waterways (including perennial, intermittent streams and wetlands); as well as ground surfaces and any other sensitive areas in the vicinity of the training areas. Potential spills/releases from this activity that may occur before and/or during the FTX include: 1. Discharge and/or improperly disposal of oil or hazardous substances into or upon land, water, or into ground water areas from storage, handling and/or transportation of hazardous materials/waste; 2. Vehicle/equipment/generators leaks; 3. Fuel loading/unloading/refueling operations; 4. Field mess facilities/equipment/operations, and/or 5. Ammunitions /explosives (as applicable, before and/or during the FTX).

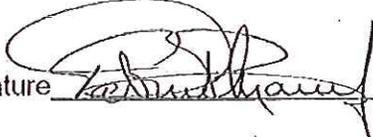

General SPCC Requirements: Ensure all hazardous materials are properly storage to prevent spill/discharges, to meet safety requirements for storage, and that containers are not exposed to the weather. Have adequate spill response supplies available during exercise for any spills that may likely occur. Use drip pans under vehicles and provide secondary containment for any fueling activities and hazardous material/waste storage. Locate all refueling operations and storage of hazardous materials/waste away from waterways and sensitive areas. See attached section on prevention procedures and CHECKlist (Example Unit/Activity SOP for Training and Deployment) to be used during training exercise to comply with SPCC plan requirements. Ensure all wastewater from field mess equipment/operations particularly those involving oil/grease are collected and dispose properly. Do not discharge any wastewater into storm drains or dispose of oil/grease waste directly into land.

General ISCP Requirements: In the event of a spill/dischage -- notify Range Control by radio or call 544-6291, and they will notify E-911 for Fire Department/HAZMAT Team assistance and/or notification of the EMD office (Spill Beeper 706-317-6584). As appropriate, and if personnel are trained -- REACT to minimize spill damages. Submit a spill report to the EPMB Spill Program Manager (use Spill Response Report attached). All spills reaching navigable water must be reported immediately. The unit is responsible for the final cleanup of any spill during this exercise. Coordination with this office is required for clearance of the site.

Soldiers involved in fusing/refusing practice grenades understand not to touch the blasting cap due to static electricity. 2. Soldiers use leather gloves when handling expended practice grenades. 3. Two 10 lb. serviceable ABC fire extinguishers are on site. 4. Soldiers wear eye protection. 	<p>How: MCOE Range and Terrain Regulation 350-19 MCOE PM 385-6-1 AR 385-63, policies and procedures for Firing Ammunition for Training, Target Practice, and Combat 3-16 CAV SQN policies on range operation Range safety brief to leaders</p> <p>Who: Ammunition Point NCO</p>	L
	Employ Hand Grenades	Soldiers Hit by Thrown Practice Grenades	M	<p>Range NCOIC or RSO will: Warn Soldiers to watch for other Soldiers in their path before throwing and actions to take if in the path of a thrown grenade. Instructors will:</p> <ol style="list-style-type: none"> 1. Allow enough distance between qualifying Soldiers to ensure overthrown practice grenades will not hit other Soldiers. 2. Ensure Soldiers wear ACH at all times while on or in the vicinity of the HGQC. 3. Ensure Soldiers not involved in the HGQC stay clear of the course. 4. Soldiers wear eye protection at all times. 	<p>How: MCOE Range and Terrain Regulation 350-19 MCOE PM 385-6-1 AR 385-63, policies and procedures for Firing Ammunition for Training, Target Practice, and Combat 3-16 CAV SQN policies on range operation Range safety brief to leaders</p> <p>Who: NCOIC; RSO, Cadre</p>	L
	Employ Hand Grenades	Lost Soldiers	M	<ol style="list-style-type: none"> 1. Safety briefing will include measures to take if lost or separated. 2. A SITREP will be provided to the chain of command, SQDN, BDE, and Range Control. 3. Headcounts at each station. 4. A thorough search will be conducted for the lost Soldier in coordination with training unit cadre and all available manpower. 5. Gain 100% accountability of Soldiers and Cadre before continuing training. 	<p>How: MCOE Range and Terrain Regulation 350-19 MCOE PM 385-6-1 AR 385-63, policies and procedures for Firing Ammunition for Training, Target Practice, and Combat 3-16 CAV SQN policies on range operation Range safety brief to leaders</p> <p>Who: NCOIC; RSO</p>	L

4. SUBTASK/SUBSTEP OF MISSION/TASK	5. HAZARD	6. INITIAL RISK LEVEL	7. CONTROL	8. HOW TO IMPLEMENT/ WHO WILL IMPLEMENT	9. RESIDUAL RISK LEVEL
Employ Hand Grenades	Soldiers unfamiliar with Hand Grenades/ Mandatory Training being conducted prior to Live Bay	M	1. Soldiers taught proper grip and throwing technique at distance and accuracy (D&A) training 2. At the mock bay, Soldiers are taught live bay procedures and rehearse the evacuation drills. 3. All Soldiers must successfully complete D&A and mock bay training prior to entering the live bay. 4. Training Company Commander, First Sergeant, or Company XO will be on site from start of training D&A, mock bay, and throwing of live grenades. 5. Pit NCOs will be SSGs certified by range NCOIC and Troop Commander. 6. No concurrent training other than throwing hand grenades will take place from the start of D&A through the completion of live bay to ensure Soldiers have their minds only on properly employing hand grenades. 7. All Soldiers will move as one unit directly from mock bay to live bay.	How: MCOB Range and Terrain Regulation 350-19 MCOE PM 385-6-1 AR 385-63, policies and procedures for Firing Ammunition for Training, Target Practice, and Combat 3-16 CAV SQN policies on range operation Range safety brief Who: NCOIC; RSO; Range Cadre; Training Company CDR; XO; ISG, Troop Commander	L
