MEMORANDUM FOR CHIEF, RANGE OPERATIONS, DPTMS, FORT BENNING, GA 31905

SUBJECT: Memorandum of Instruction for 3rd Battalion, 75th Ranger Regiment Platoon CQB training at residential district.

1. Purpose. This MOI outlines the training concept and timeline for 3/75 Platoon CQB training at residential district.
2. Situation:
 - a. Task Organization: 3 x Ranger Rifle Platoons, 1 x Ranger HQ PLT
 - b. Light Data:
 - BMNT: 0717
 - Sunrise: 0741
 - Sunset: 1911
 - EENT: 1935
3. References.
 - a. RTC 350-10 *dtd Oct2006* (75th Ranger Regiment Marksmanship Program)
 - b. RTC 350-1 *dtd 12Mar1998* (75th Ranger Regiment Training Circular)
 - c. MCoE Regulation Number 350-19 *March2013*
 - d. STP 21-1-SMCT *dtd Dec2007*
 - e. FM 3-22.9 (Rifle Marksmanship M16/M4 Series Weapons). *dtd AUG08*
 - f. FM 3-22.68 (Crew-Served Machine Guns 5.56-mm and 7.62-mm) *dtd. JAN03*
 - g. Regimental Breaching Guide, RTC 350-19
 - h. Use Visual Signaling Techniques (071-326-0608)
 - i. Enter a Building During an Urban Operation (071-326-0541)
4. Training Objective: Each Ranger is proficient at conducting Battle Drill 6 at the individual level. When each Ranger has demonstrated the proper level of proficiency, training will focus on the Team and Squad mechanics of clearing single and multiple rooms. After the completion of dry and blank iterations, training will focus on alternate Squad level scenarios utilizing simunitions.
 - a. Individual Tasks:
 - (1) Zero an M4 or M4A1 Carbine (071-100-0001)
 - (2) Engage Targets with an M4 or M4A1 Carbine (071-100-0003)
 - (3) Engage Targets During an Urban Operation (071-440-0028)
 - (4) Engage Targets with an M249 (071-010-0006)
 - b. Collective Tasks:
 - (1) Enter a building/Clear a room
 - (2) Move as a member of a team/squad
5. General. The training platoon will conduct Squad CQB simunition exercises at residential district IOT maintain and improve Individual Ranger skills and small unit leader proficiency. Each Platoon will have one day at residential district for multiple dry fire and simunition iterations. Once dry and simunition iterations are complete, PLT will continue with simunition training. This will allow the PLTs to alter

AORG-TB-CB

SUBJECT: Memorandum of Instruction for 3rd Battalion, 75th Ranger Regiment Platoon CQB training at residential district.

scenarios in the buildings, giving the SQDs a new scenario and a cold run each time. The end state is that all Ranger SQDs execute and certify multiple teams, multiple rooms day/night simunition fire. See enclosures for scheme of maneuver.

6. Concept of the Operation.

Phase I (Training Resourcing) This phase will begin with the production of the MOI for CQB at Residential District. This phase will include all resourcing, CONOP, MOI and risk assessment production, range preparation, rehearsals and briefings. The key to this phase is the completion of AMT. This phase will end with the commencement of training.

Phase II (Range Execution) This phase will begin with the commencement of training. This phase will include all Ranger fire teams and squads firing simunitions in single and multiple rooms. The key to this phase is all Rangers successfully completing TM and SQD level CQB. Rangers will also complete familiarization training with flash bang munitions. Scenarios will include (refer to attached overlay for building number markings):

- Single Building: Buildings 1-10 individually as TMs and SQDs
- Double buildings: Structures adjacent to each other on the same side of the street or across the street from each other. For example, building 1 then 3 or building 4 then 5 as TMs and SQDs.
- Clearing Streets: Going from north to south or south to north along the main street clearing all structures as a Squad or Section.
- Whole Village: Time permitting the training platoon will conduct blank or dry iterations throughout the entire village. They will conduct entry from all directions utilizing fire and maneuver.
- The soccer field/open field adjacent to the village will be utilized as a staging area/notional air assault HLZ.
- Conduct flash bang familiarization training in the soccer field.
- A specific scenario would include: one squad covering another as it moves into and clears building 8. Once building 8 is secure the other squad moves up to 8 and consolidates. They then move under cover to and clear building 9. Once building 8 and 9 are secure the squad leader will consolidate information, report to higher and prepare to receive the rest of the Platoon. The rest of the Platoon will move up to and past those two squads and into building 10. The Platoon will continue to bound from building to building clearing as it goes till all buildings are clear. They will then prepare a hasty defense of the village by setting up BPs at the three corners of the village. The Platoon will then retrograde back to the open field for a notional exfil.**

Tasks to be trained during this phase are:

- TM and SQD CQB
- PLT operations in an urban environment
- Fire and Maneuver
- Fires deconfliction and coordination
- Flash bang familiarization
- Moving between structures while keeping security
- Covering movements of adjacent units while conducting CQB

This phase will end with at the conclusion of training.

Phase III (Recovery) This phase will begin at the conclusion of training. This phase will include recovery of the range, preparation for the next training event and maintenance of weapons and equipment. The key to this phase is 100% accountability and preparation for the following training event. This phase will end when the Platoon has completed Range rehab and left the range.

7. Responsibilities.

AORG-TB-CB

SUBJECT: Memorandum of Instruction for 3rd Battalion, 75th Ranger Regiment Platoon CQB training at residential district.

- a. 2nd Platoon Leader (1LT BLANCHARD).
 - (1) Produce MOI, CONOP, Risk Assessment, Range Packet.
 - (2) Supervise Range preparation IAW approved scheme of maneuver.
- c. Training Platoon's Platoon Leader. Range OIC.
- a. Training Platoon's Platoon Sergeant.
 - (1) RSO
 - (2) Conduct Safety Brief
 - (3) Supervise PCC/PCI's and PMI
- b. CO. Approve the range Risk Assessment
- c. XO.
 - (1) Coordinate for range
 - (2) Coordinate resources for range (see Service and Support paragraph)

8. Coordinating Instructions.

- a. Uniform:
 - (1) Phase I: duty.
 - (2) Phase II: field, full kit.
 - (3) Phase III: field.
- b. TIMELINE: See Enclosure 1.
- b. SERVICE AND SUPPORT:
 - (1) Class I:
 - (a) Meal cycle will be: D-M-A
 - (b) Water will be provided in 5 gallon water cans.
 - (2) Class II: 1x Box Green Chem lights, 1x Box red Chem Lights, 1x Box blue Chem lights, 4 rolls 100MPH tape, 2x rolls engineer tape, 250 x assorted color balloons, 40 x E-type silhouettes, 10 x cans spray adhesive.
 - (3) Class V: 19,085 rds (X256)
 - (4) Medical: Training Platoon's medic will provide medical coverage. Platoon will provide dedicated ground CASEVAC vehicle.
 - (5) Transportation:
 - (a) 1 x FLA (dedicated medical vehicle).
 - (b) 1 x Bus (Ranger transportation)
 - (6) Communication: 1 x range brick, all assigned 117Gs and MBITRs, 3/75 cell phones.

9. Safety:

- a. LASERS: Class III A lasers are not eye safe on dual low mode within 25 meters. PEM – 1A is not a tactical laser and must be used within 25 meters. Laser Warning Signs will be in place prior to opening the range. **Range safety briefing will include hazards using Lasers and NVDs.**

SUBJECT: Memorandum of Instruction for 3rd Battalion, 75th Ranger Regiment Platoon CQB training at residential district.

- b. Communications: 3rd Battalion, 75th Ranger Regiment will maintain continuous contact with Range Control at all times. If communications are lost the unit will go into a self-induced check fire until communications are restored.
- c. Incident: When an incident occurs on the range, regardless of injury or not, the OIC/RSO will immediately call a cease fire and report it to Range Control and the using unit's higher headquarters. OIC/RSO will take action as directed by Range Control. The cease fire will remain in effect until the problem is resolved and cleared through Range Control. If the incident results in an injury, the OIC/RSO will use the procedures outlined in the medical paragraph. The following information will be furnished by the OIC/RSO to Range Control:
 - (1) Designation of unit
 - (2) Range and location
 - (3) Type of weapon involved
 - (4) Type of ammunition involved
 - (5) Brief summary of what happened
 - (6) Personnel injuries and extent
 - (7) Full name, SSN, Rank and unit of injured personnel
 - (8) Extent of property damage
 - (9) Intentions regarding an AR 15-6 investigation
- d. Medical: In the event of an accident, injury or illness, the OIC/RSO will immediately call a cease fire then call 911 using the standard 9-line MEDEVAC to determine what type of evacuation is the most appropriate for the injury (loss of life, limb, or eyesight). MEDEVAC will be IAW MCoE Regulation 350-19 and MCoE 40-2. Landing zone for MEDEVAC aircraft will be established prior to use and will be marked appropriately. Range Control will be notified in this event. The cease fire will remain in effect until cleared through Range Control.
- e. Ammunition: Rangers will conduct a weapons and ammo check with their first line supervisor before entering the beginning the range in order to ensure they are firing the correct ammunition (i.e. blanks or UTM). Rangers will only load UTM ammunition when they are beginning the range (stepping onto the soccer field) and will clear their weapons when the step off the field at the conclusion of the iteration.
- f. Weapons/Ammunition Malfunction Reports: When a malfunction is experienced, the OIC/RSO will suspend all firing and immediately notify Range Control. The weapons and all components and ammunition involved will remain in place. The cease fire will remain in effect until cleared through Range Control. An investigation is required and will be conducted by the ammunition and weapons inspection personnel and DOL.
- g. Ammo Point: The ammo point NCO will control the issue and retrieval of all ammunition. All ammunition (blank, live, HE, TP-T, etc.) will be marked and physically separated within the ammo point (or separate ammo points) and signed by the ammo NCO.
- h. Rehearsals: The "Crawl-Walk-Run" method of training will be the standard for all LFX. A detailed leader's TEWT will outline all range fans, restrictions, and safety considerations. Day/night dry-blank fire exercises will be conducted prior to getting clearance to participate in any live fire exercise (LFX). The day phase will be completed prior to the night phase. The dry-fire, blank-fire exercise and the live fire exercise will have dedicated observer/controller teams.
- i. Signals: Primary means of signaling shift/cease fire will be FM communication. Alternate signal will be VS-17 panel. Company Leadership will be with each element to confirm receipt of signals by tactical radios. Emergency cease fire signal will be Air-horn held by the SBF and

AORG-TB-CB

SUBJECT: Memorandum of Instruction for 3rd Battalion, 75th Ranger Regiment Platoon CQB training at residential district.

Assault element's evaluators. All signals will be included in the initial safety briefing. Anyone observing any unsafe act can call for a Cease fire.

- j. PPE: Rangers and OCs will wear proper PPE at all times in order to protect from injuries common with urban training as well as to prevent injuries from fratricide. Including body armor, gloves, earpro, eyepro, and ACH or OPSCORE.
- k. Roadguards: Rangers will be posted with radios to the OIC/RSO at road guard positions located at key intersections surrounding Residential District. This is to prevent unauthorized access to the range while conducting training.

10. POC for this memorandum is the 2/B Platoon Leader, 1LT Michael Blanchard, at 545-6299, michael.d.blanchard@ahqb.soc.mil.

OVERVIEW: B CO, 3/75 Platoons will conduct battle drill six training over the course of four days. Platoons will rotate through the range over the course of four days and provide all internal personnel support (OIC/RSO/RFR). Platoons will commence all range firing NLT 1100 and complete all firing NLT 0100. Platoons are responsible for PMI, safety briefs, and ammo management for all firing.

OIC/RSO MATRIX

DATE	OIC	RSO
24 MAR 14	1LT Blanchard	SFC Wertz
25 MAR 14	1LT Blanchard	SFC Wertz
26 MAR 14	1LT Israel	SFC Torres
27 MAR 14	1LT Kavanagh	SFC Smith

TRANSPORTATION PLAN

1 x Bus per platoon

AMMUNITION MATRIX

DATE	DODIC/ QUANTITY	DROP OFF	PICK UP
24 MAR 14	AB09 x 15,750	1000L	1700L
24 MAR 14	AB16 x 3,335	1000L	1700L
24 MAR 14	X689/X699 x 90	1000L	1700L

TARGETRY PLAN

-Platoons will provide their own targetry and range supplies from Company-internal stock.
- Platoons will need a minimum of 40 E-types and 250 multi-color balloons

CHOW/WATER PLAN

-Meal cycle will be Breakfast (DFAC/Home)/ Lunch (MRE)/ Dinner (Mermites)
-Mermites will be transported to the range via HQ personnel.
-Platoons will provide 6 full water cans for training. Water resupply points are available on the range.

MEDICAL PLAN

-A minimum of a RFR-certified NCO will be present on the range during all firing windows. A CASEVAC route recon will be completed prior to range firing.
- B Co medics will be available and RFR bag being present is the minimum requirement for opening the range.

OVERALL RISK LEVEL FOR EVENT: **L** M H

RISK MANAGEMENT WORKSHEET APPROVED/SIGNED: **Y** N

COORDINATING INSTRUCTIONS (TASKS COMMON TO ALL):

Performance Measures:

- 1) All Rangers will certify dry/blank before moving to UTM training.
- 2) All ammunition is consumed IAW the training plan.

Range Open/Close Procedures

- 1) Complete MEDEVAC rehearsal/route recon to trauma facility (for maneuver live fires only).
- 2) ASP established (ammo off the ground/sorted by type/blanks separated from live)
- 3) Establish Water Point/Fill out Required Paperwork in Range Book prior to arrival of Range Control.
- 4) Range Opened w/ Range Control early enough to allow inspector to make it to range prior to firing (Malone, Brann, Booker, Red Cloud).
- 5) Range safety brief complete/ RMWS reviewed with all firers.
- 6) Range flag flown/ Range Chem (red) cracked.
- 7) Police Range/Coordinate with Range Control to be Cleared off.
- 8) Provide detail at AHA for Ammo turn in (PL/PSG only get keys).
- 9) Consumption Report due to XO prior to COB. CCIR for XO significant expenditure shortfalls.

///ORIGINAL SIGNED///LESZCZYNSKI, PETER J. CPT, IN

Residential District 3/75

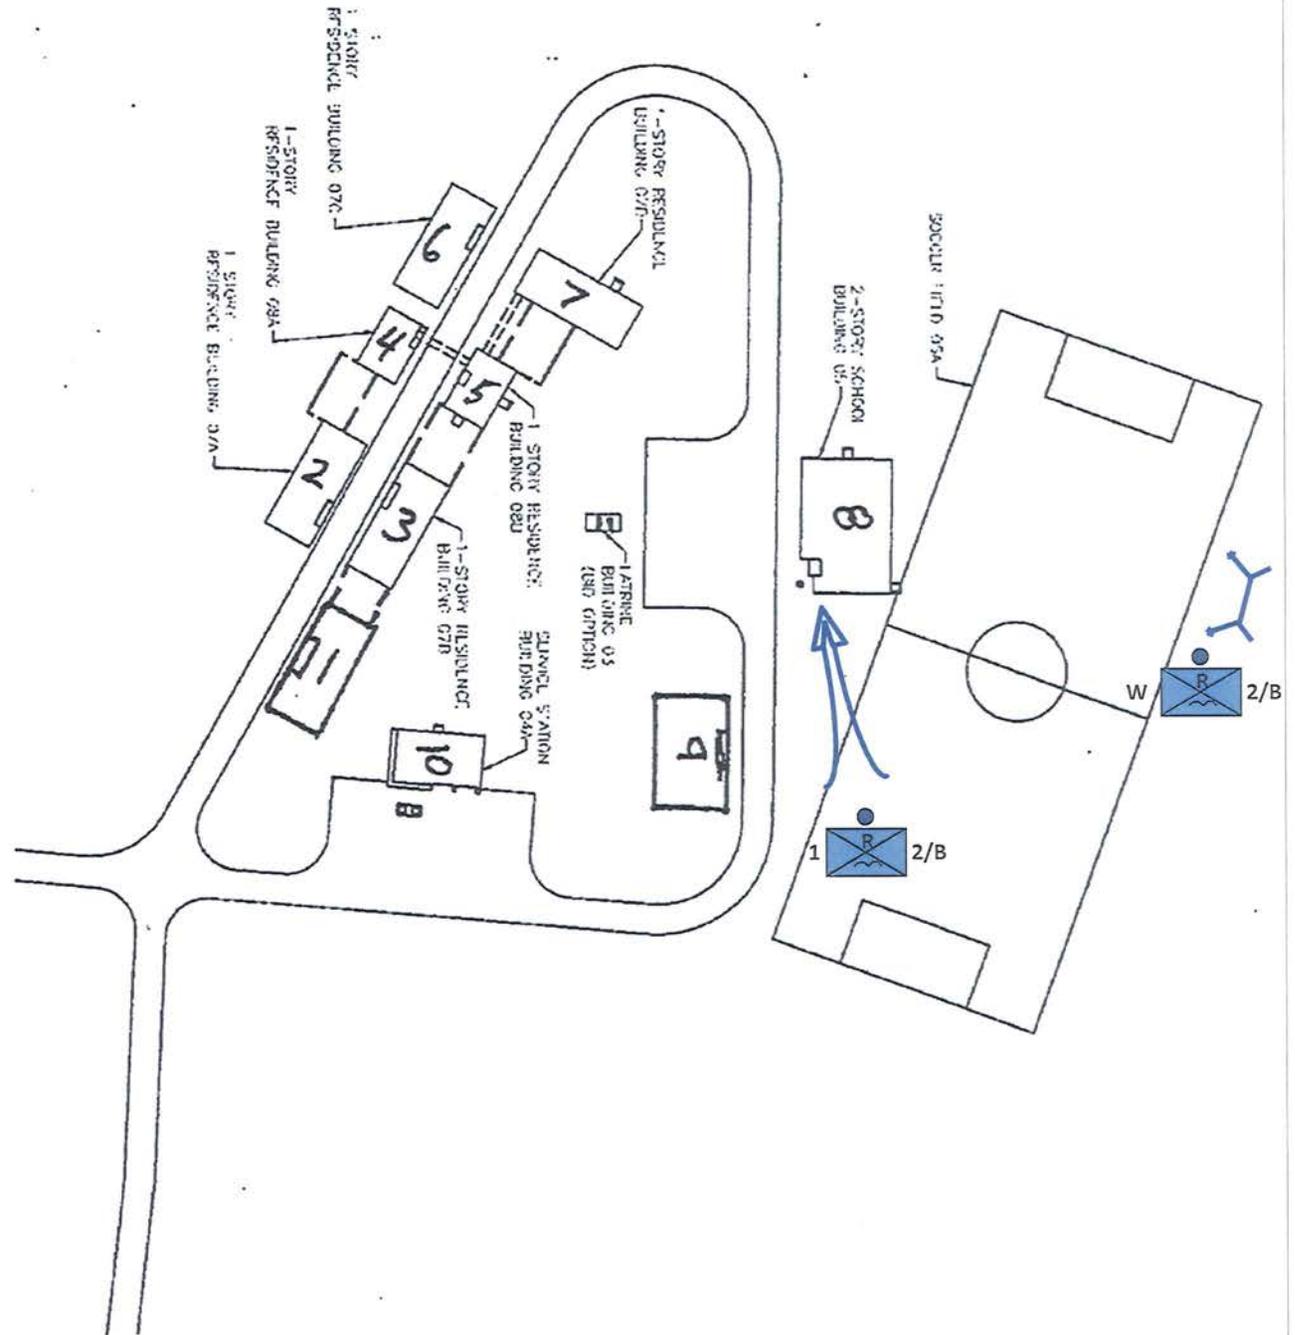

Scheme of Maneuver

Phase 1: Infiltration

- Begins: SBF West of Village
- Ends: Gain a foothold in building 8

Scheme of Maneuver: Utilize fire and maneuver to gain a foothold in the village.

Targetry: E-type targets held with balloons will be utilized as targets during the clearances. No more than two targets will be hung in each room. Targets will be hung in various locations as to not create repetition during the course of the clearance. Targetry will remain the same when going from dry/blank to UTM iterations.

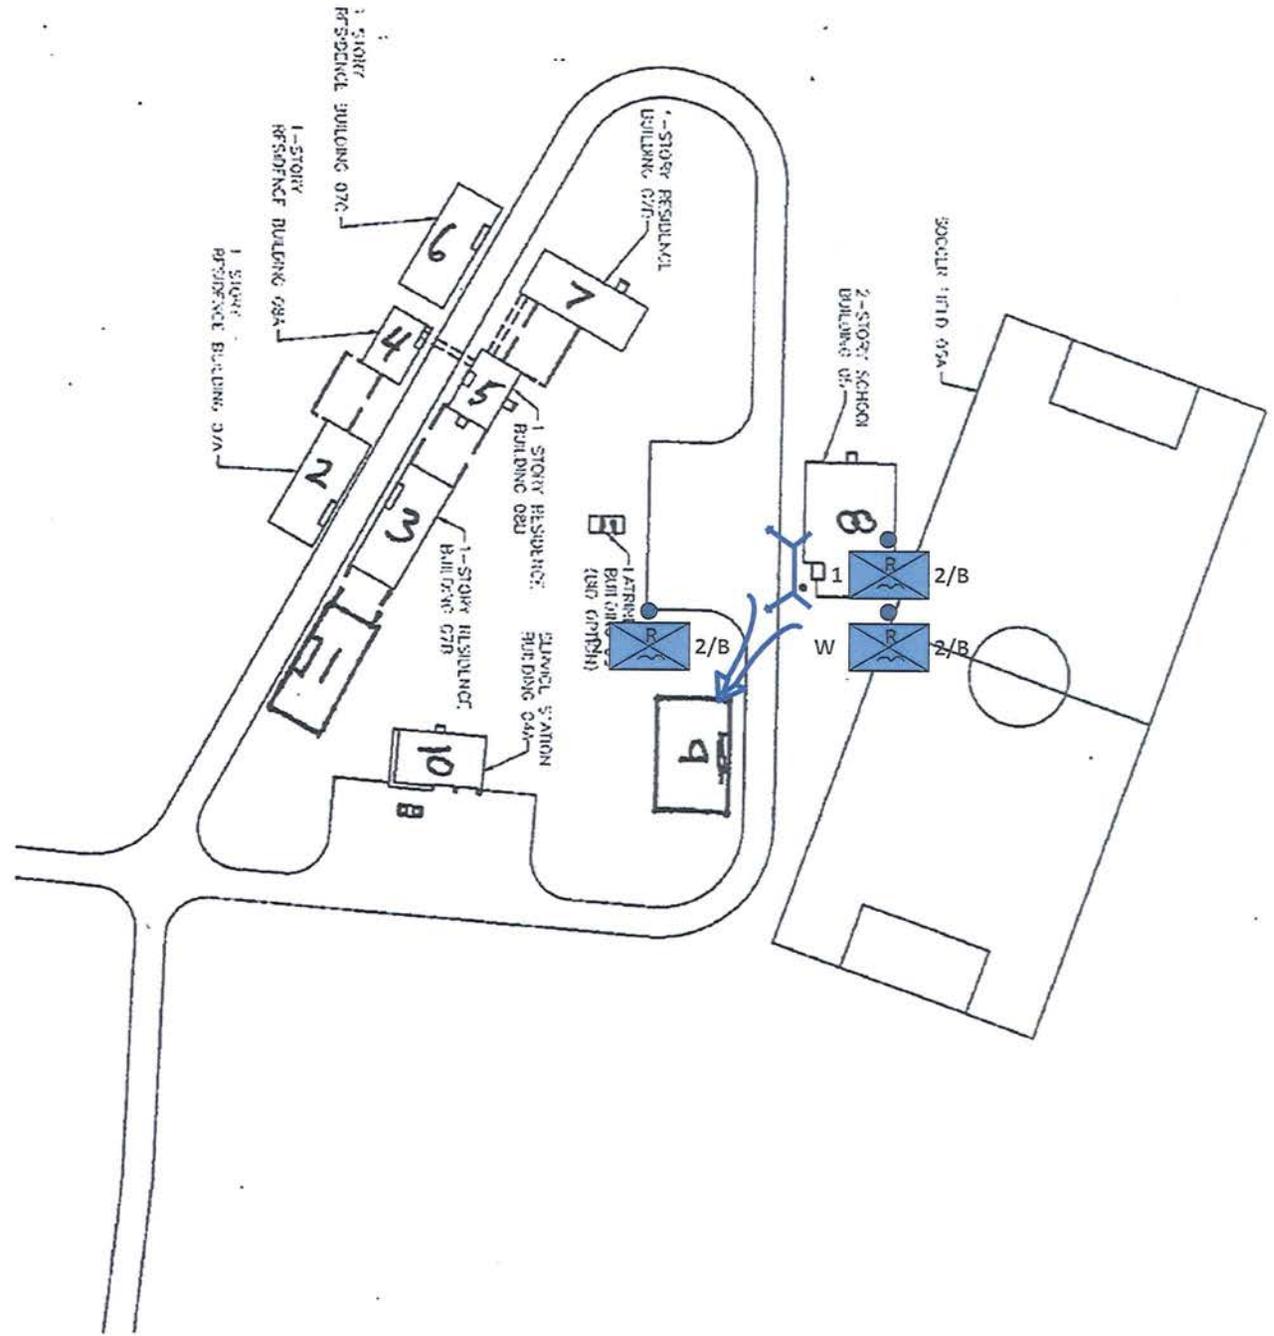

Phase 2: Assault on Residential District

- Begins: Gain a foothold in building 8
- Ends: Seize Residential District

Scheme of Maneuver: Utilize the foothold and fire and maneuver to begin clearance of subsequent buildings.

Targetry: E-type targets held with balloons will be utilized as targets during the clearances. No more than two targets will be hung in each room. Targets will be hung in various locations as to not create repetition during the course of the clearance. Targetry will remain the same when going from dry/blank to UTM iterations.

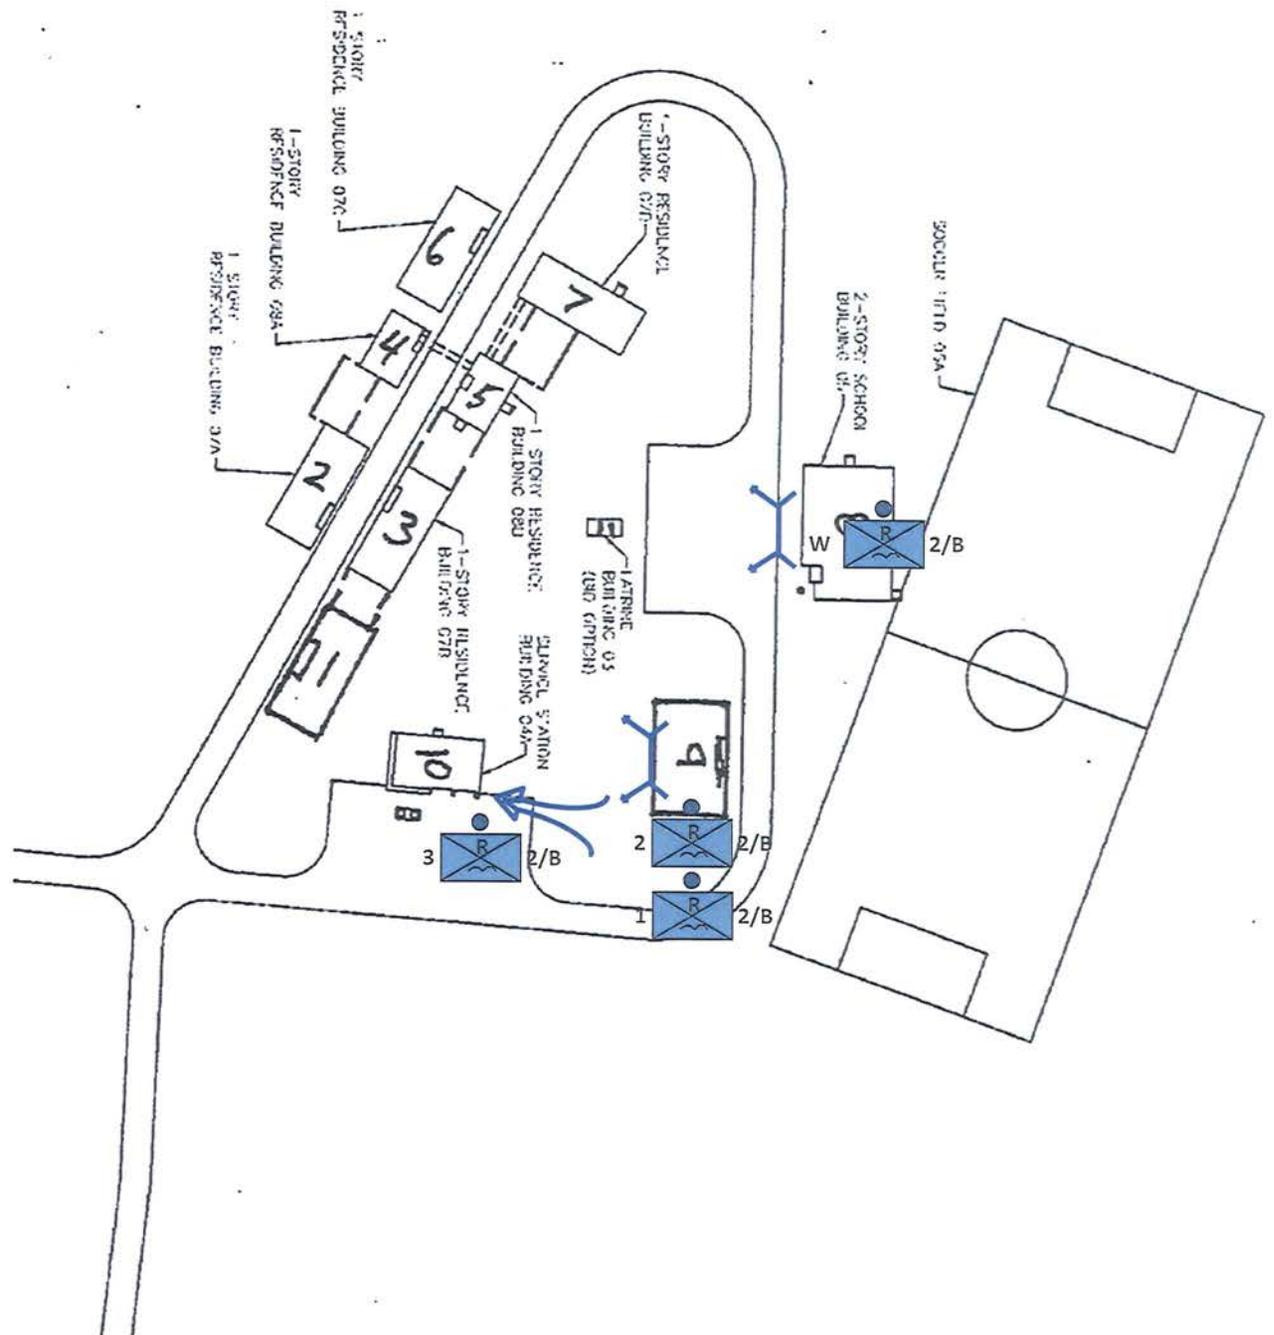

Phase 2: Assault on Residential District

-Begins: Gain a foothold in building 8

-Ends: Seize Residential District

Scheme of Maneuver: Utilize the foothold and fire and maneuver to begin clearance of subsequent buildings.

Targetry: E-type targets held with balloons will be utilized as targets during the clearances. No more than two targets will be hung in each room. Targets will be hung in various locations as to not create repetition during the course of the clearance. Targetry will remain the same when going from dry/blank to UTM iterations.

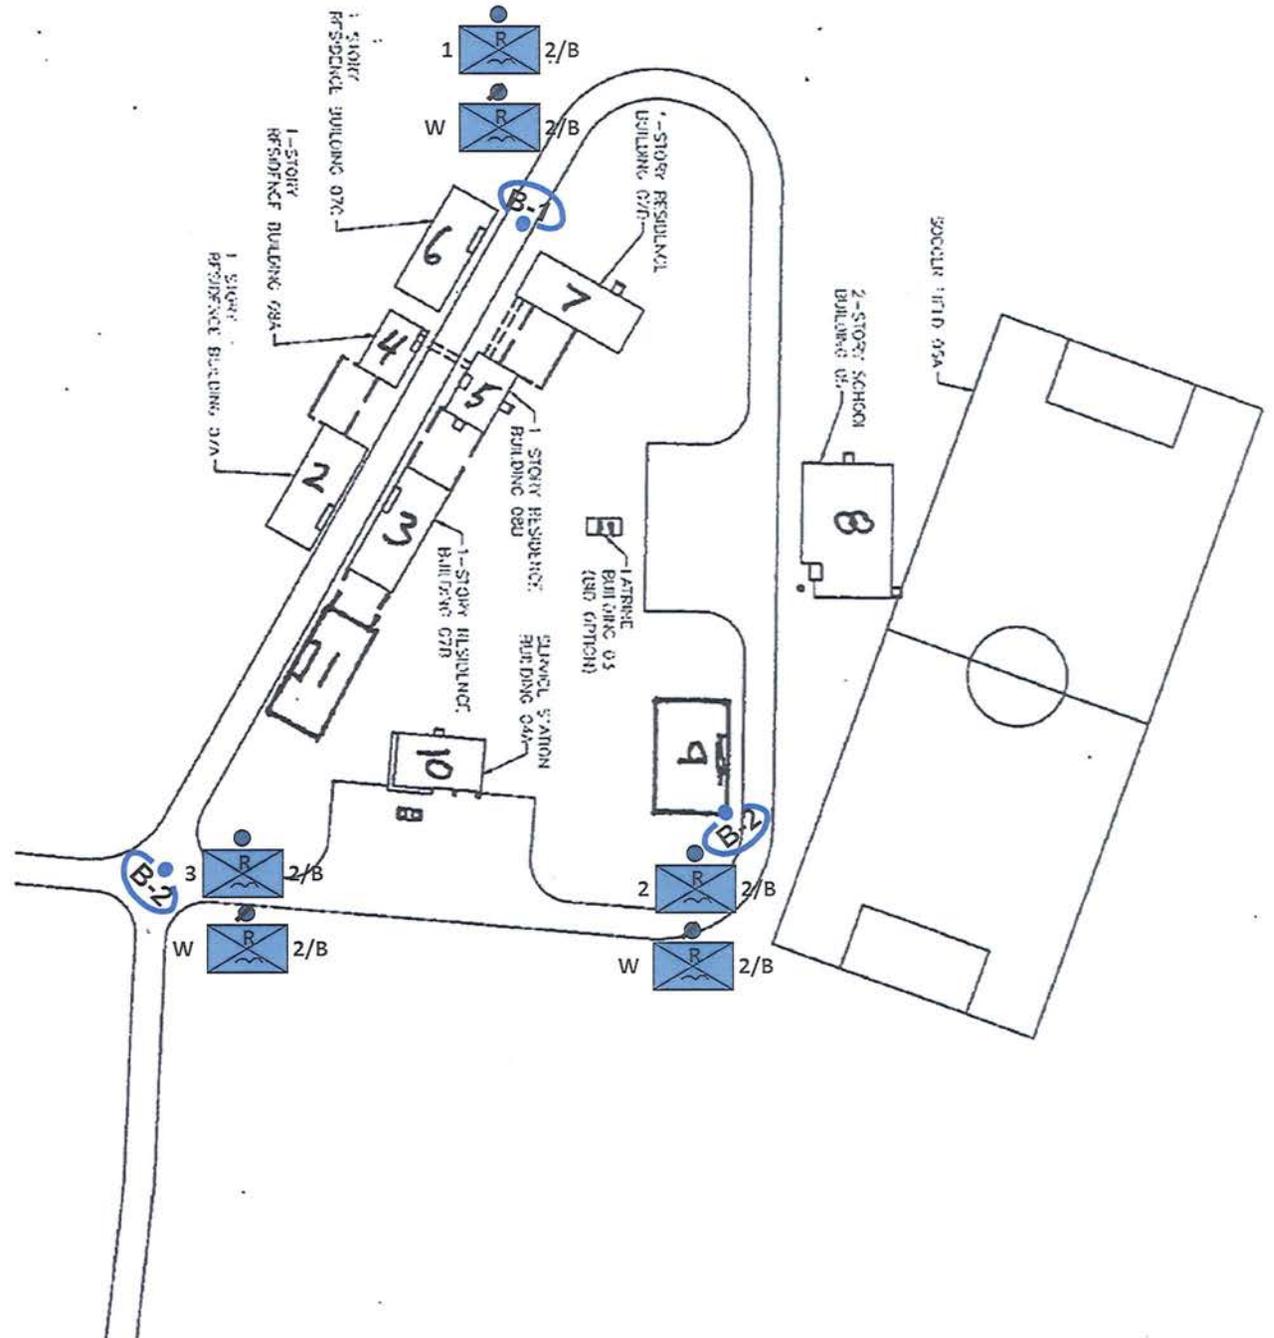

Phase 3: Defend Residential District

- Begins: Seizure of Residential District
- Ends: BPs established

Scheme of Maneuver:
Establish a defense of the village using BPs in order to prevent possible counterattack.

Targetry: E-type targets held with balloons will be utilized as targets during the clearances. No more than two targets will be hung in each room. Targets will be hung in various locations as to not create repetition during the course of the clearance. Targetry will remain the same when going from dry/blank to UTM iterations.

DECISION: Concur with conditions

This Action qualifies for a Categorical Exclusion **I-3** of Appendix B, (32 CFR 651)

(I-3): Intermittent on-post training activities (or off-post training covered by an ARNG land use agreement) that involve no live fire or vehicles off established roads or trails. Uses include, but are not limited to, land navigation, physical training, Federal Aviation Administration (FAA) approved aerial over-flights, and small unit level training.

REC APPROVED THROUGH 30 SEPTEMBER, 2014

Natural Resources - RCW

Conditions:

Michael Barron (706 544 7080), 1/31/2014

See attached conditions. Note locations of red-cockaded woodpeckers (RCW) on attached maps. Training restrictions apply. Unit commanders must make sure that all troops know the locations of restricted areas and understand these training restrictions. This is imperative since night training may occur. Boundaries are often hard to see at night, but this is no excuse for violations to occur. Two hour time restriction is for 2 hours once every 24 hour period. Note where digging may not occur. All trenches, fighting positions, etc must be filled in prior to leaving an area. There must be no cutting down or intentional destruction of any pine trees throughout the requested area(s).

Hazardous Materials/Waste

Conditions:

Carlos Ariasochoa (706 545 1857), 2/3/2014

Defective, misfired, or otherwise unserviceable munitions must be managed IAW/MCOE Reg.350-19-5-10, Para 9-2 (Proper management of Misfired munitions). All excess, munitions must be returned to the Ammunition Supply Point after the field exercise is completed. Rubbish, empty containers and other waste (including used smoke/C2 canisters) should be removed from the training area. A dud shall not be removed from the range; it will be marked, called into range control and will be properly disposed of by EOD personnel IAW/MCOE Reg. 350-19, 23 Jul 2010.

Any wastes generated must be evaluated for their hazardous characteristics and disposed of in accordance with all Federal, State and Fort Benning Hazardous Waste Regulations. Appropriate precautions must be taken to prevent hazardous material spills. Adequate quantities of spill response supplies must be on hand while work is being performed. If a spill occurs use notification procedures as outlined in the Fort Benning Hazardous Waste Management Plan Chapter 14. Contain and clean up any spill according to guidance provided by the Environmental Programs Management Branch. EPMB provides an 8 hours course covering Hazardous Materials/Waste Management, Hazardous Waste Minimization, Safety, and Pollution Prevention.

Noise

Conditions:

Ellis Leeder (706 545 2400), 1/31/2014

This is training operations request for training. If there is any operational noise complaints received, the Environmental Management Division Installation Operational Noise Monitoring Program (IONMP) and or Public Affairs Office (PAO) programs will investigate and then recommending operational noise mitigation actions to the appropriate personnel for the training actions. In accordance with the Armys policy on environmental noise management, all efforts shall be made to minimize noise annoyances to the highest extent practicable with training operations without interfering with the proposed missions. Units that do air missions will now be required to bring a copy of their RFMSS request to Lawson Army Airfield (LAAF) when coordinating for Airspace requirements. Please follow the fly friendly program avoiding noise abatement areas. Please follow good smoke management practices not allowing smoke or dust to travel off Installation boundary into public areas or roads. Please increase distance between vehicles when dust conditions are extreme, see Table 5-3. CS gas use should be utilized in designated areas only, contact Range Control for a listing of approved CS gas sites. Please visit the Range Operations website to obtain a list of approved weapons per Range or Firing Points. . Leave the training areas, firing range, latrines in a clean condition; contact Range Operations if unclean conditions are found or clean up costs or cleaning endeavors by proponent could occur to last user. If any assistance or a copy of MCoE Regulation 350-19 or the IONMP noise plan is needed for review, please feel free to contact Ellis Leeder at 706.545.2400 or email ellis.p.leeder.civ@mail.mil or visit the Range Control Website for the updated version of MCoE Regulation 350-19, range guidance and other materials for your range packet. This 144r must be present at the training site when occupying compartment or ranges.

Air Management Programs

Conditions:

Ellis Leeder (706 545 2400), 1/31/2014

This is necessary training that should be conducted however, with the use of Smoke generators, Smoke Grenades, C/S gas, portable power generators, and smoke pots, special considerations apply to the compartment boundary locations as not to let smoke or gas travel into adjacent communities or roadways both on and off the Installation. Range safety should be informed and utilized for managing training with smoke/gas devices as weather conditions can change hourly. It is important to consult MCoE Regulation 350-19 prior to training activity. Please review particular training restrictions found in section 5-20 of the Regulation. If you need assistance feel free to contact the Air Quality Program, shannon.t.danley.ctr@mail.mil or call 706 545-1298.

CWA - Training

Conditions:

Leah Ropski (706 626 0492), 1/31/2014

Environmental Review: Caution within training areas and motor pools should be taken to protect all nearby waterways (including perennial, intermittent streams and wetlands); as well as ground surfaces and any other sensitive areas in the vicinity of the training areas. Potential spills/releases from this activity that may occur before and/or during the FTX include: 1. Discharge and/or improperly disposal of oil or hazardous substances into or upon land, water, or into ground water areas from storage, handling and/or transportation of hazardous materials/waste; 2. Vehicle/equipment/generators leaks; 3. Fuel loading/unloading/refueling operations; 4. Field mess facilities/equipment/operations, and/or 5. Ammunitions /explosives (as applicable, before and/or during the FTX).

General SPCC Requirements: Ensure all hazardous materials are properly storage to prevent spill/discharges, to meet safety requirements for storage, and that containers are not exposed to the weather. Have adequate spill response supplies available during exercise for any spills that may likely occur. Use drip pans under vehicles and provide secondary containment for any fueling activities and hazardous material/waste storage. Locate all refueling operations and storage of hazardous materials/waste away from waterways and sensitive areas. See attached section on prevention procedures and CHECKlist (Example Unit/Activity SOP for Training and Deployment) to be used during training exercise to comply with SPCC plan requirements. Ensure all wastewater from field mess equipment/operations particularly those involving oil/grease are collected and dispose properly. Do not discharge any wastewater into storm drains or dispose of oil/grease waste directly into land.

General ISCP Requirements: In the event of a spill/discharge -- notify Range Control by radio or call 544-6291, and they will notify E-911 for Fire Department/HAZMAT Team assistance and/or notification of the EMD office (Spill Beeper 706-317-6584). As appropriate, and if personnel are trained -- REACT to minimize spill damages. Submit a spill report to the EPMB Spill Program Manager (use Spill Response Report attached). All spills reaching navigable water must be reported immediately. The unit is responsible for the final cleanup of any spill during this exercise. Coordination with this office is required for clearance of the site.
