DLA TROOP SUPPORT

Serving the Warfighter & Our Nation

CLOTHING & TEXTILES

AMERICAN-MADE | BERRY-COMPLIANT

On 23 December 2016, Section 817 of Fiscal Year 2017 National Defense Authorization Act (NDAA) eliminated the cash allowance system used by the Army, Navy, and Air Force and directs all Services to provide Berry Amendment compliant athletic footwear directly to recruits.

The Athletic Footwear Program is a joint Services effort that achieved DoD wide concurrence on the athletic shoe designs & will be fielded in under 24 months. Recruits now have more variety in lengths and widths than any commercial athletic shoe in the world!

There are three types of athletic footwear: neutral, stability and motion control

FOOT TYPE

HIGH ARCH

SHOE TYPE

Type I (Cushion/Neutral shoe) accommodates users with high arches

- The midsole is designed to reduce impact on the lateral (outside) edge of the user's foot and provide enhanced shock attenuation during walking or running

MEDIUM ARCH

Type II (Stability shoe) accommodates users with moderate arch heights and moderate pronation

- The midsole is designed to provide a combination of cushioning and support to prevent excessive pronation during walking or running

LOW ARCH

Type III (Motion Control shoe) accommodates users with low arches and severe over-pronation.

- The midsole is designed with enhanced medial (inside) support to prevent excessive pronation during walking and running

There are 100 men's sizes available from size 4 to 16 and four different widths

Men's unit price:
\$91.73
