

2-4 RTE TECHNIQUE

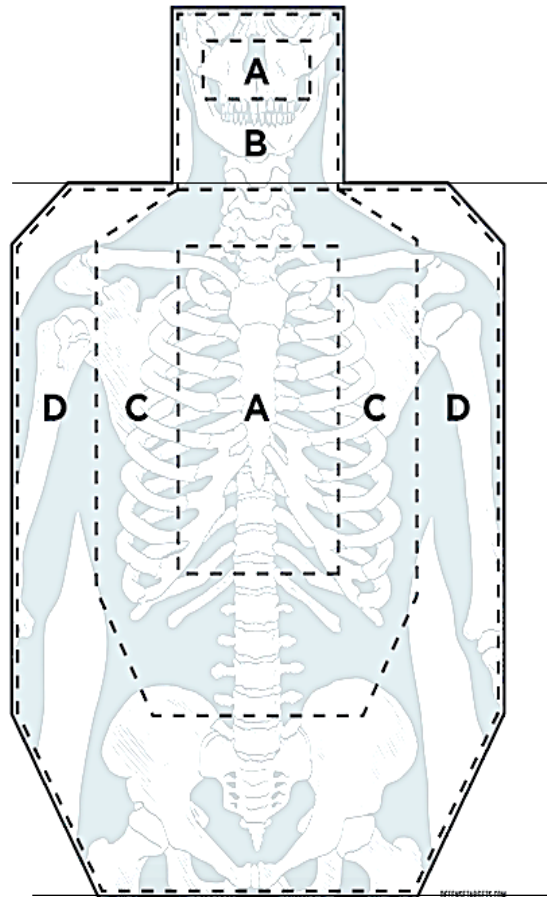

2-4 Technique: The average male arm length span is 25". This technique is effective from 100 to 545 meters. Sniper flash MILs the torso of the target (25") and applies the appropriate hold based on what the flash MILs is:

- ☐ **OVER 1.5 MILs, HOLD 2 MILs COVM**
- ☐ **UNDER 1.5 MILs, HOLD 4 MILs COVM**

Note: Deviation in inches using 2 or 4 MIL hold at (x)hundreds of meters. On the Torso, you only have 12.5" from center to top and bottom.

- (2 hold) 100m - 7.87" High
- (2 hold) 200m - 11.02" High
- (2 hold) 300m - 5.6" High
- (2 hold) 400m - 9.76" Low
- (4 hold) 500m - 2.16" Low
- (4 hold) 545m - 11.3" Low

**FLASH MIL TORSO WITH
RETICLE**
