### **Machinist-Warm Springs GA**

*"Innovation is facilitated by having the right people in the right roles with the right skills and values."*

*- Charles Koch, Koch Industries Chairman and CEO*

Georgia-Pacific is seeking a highly motivated self-starter to be a part of our Warm Springs, GA maintenance team. We are looking for our next team member to join as a **Machinist** to help support the facility maintenance and meet production goals. This is a great opportunity to utilize and build on your skills with a growing organization!

Georgia-Pacific in Warm Springs, GA manufactures Plytanium® plywood sheathing which is ideal for residential and light commercial construction and Ply Frame® Panels which is softwood & hardwood veneer used for commercial and residential construction, home remodeling, large DIY projects and upholstered furniture framing. Our facility has been in the community and in operations for forty years. GP employees strive for safety and health excellence while achieving an injury free workplace. To learn more about our Building Products division, visit [www.buildgp.com](http://www.buildgp.com).

### **A Day In The Life Typically Includes**

- Help meet or exceed production waste and quality goals through a quality maintenance program
- Conduct maintenance on equipment in accordance with the scheduled maintenance requirements
- Work closely with various members of the maintenance team to collaborate on projects and work orders
- Maintain a clean work area throughout shift
- Adhere to and promote all safety policies, procedures and guidelines to ensure a safe work environment throughout the plant

### **What Do You Need**

- High School diploma or GED
- A minimum of three (3) years of experience in vertical mills and lathes
- Willing and able to complete setups independently
- Experience in machining steel, stainless steel, aluminum, cast aluminum and cast iron
- Willing and able to provide personal hand tools
- Knowledge of tool holders, insert types, lathe threading, turning and boring setup ups
- Experience with hydraulics and pneumatics
- Experience reading hydraulic schematics and blue prints

- Experience in fabrication, welding and utilizing cutting torches
- Experience in geometric tolerances, inspection gages, and layout procedures
- Willing and able to troubleshoot, install, align, dismantle and repair industrial machinery and mechanical equipment
- Experience troubleshooting and repairing bearings, chains, and sprockets
- Experience in precision alignment of motors and couplings
- Willing and able to operate hoisting and lifting devices
- Willing and able to perform reverse dial indicator shaft alignment
- Willing and able to work any shift, variable start times, overtime, weekends, and holidays as scheduled
- Willing and able to maintain a strict adherence to safety rules and regulations to include wearing safety equipment

### **What Would Put You Ahead**

- Experience with laser alignment
- Technical degree or higher in Machine Technology or Machine Tool Technology
